IMPORTANT TESTIMONIALS of the Wonderful Efficacy of

DR. SIMES' PEPSINE MIXTURE

In Curing Indigestion, Liver Complaint, &c.

Marvellous Cure of Indigestion, Wind, &c.

Mr. CARTER, of 84, Barr Street, Birmingham, writes: I have suffered very much from Indigestion and Pains in the Chest after eating; also very bad with the Wind. I had heard a great deal about Dr. Simes' Pepsine Mixture, so I thought I would try it. I did so, and can assure you that the first dose gave me relief, and two bottles quite cured me.

Camden Villa, Coventry Road, Birmingham.

Mr. MASON, Dear Sir,—I find your Dr. Simes' Pepsine Mixture to be a first-class Medicine for Indigestion, Head-Ache, Flatulency, and any Derangement of the Liver. I found relief after every dose I took. I do not believe in Patent Medicines as a rule; but am quite satisfied with the extraordinary results of Dr. Simes' Speciality. You can do as you like with this.

I remain, yours truly,
T. NEWTON.

Extraordinary Cure of Wind, Acidity, and Pains in the Chest.

Mr. G. F. WATSON, of 15, Hylton Street, Birmingham, writes:—Your Dr. Simes' Pepsine Mixture is really a wonderful medicine for Indigestion, Pains in the Chest and Bowels. I should think no one has suffered more than I have from the above complaint. I have found the greatest relief from it; I am sure I cannot praise it too highly. I think if it is brought before the public it will be the greatest boon to all who suffer, and especially people leading sedentary lives and having little exercise.

Immediate Relief from Indigestion.

Barmouth.

Mr. MASON, Dear Sir,—My wife has been suffering for this last week with Indigestion, Palpitation, Acidity, Pains between the shoulders, so bad she could hardly get about. I called at your shop and bought a bottle of Dr. Simes' Pepsine Mixture, from which she derives great benefit, every dose doing her good, even from the first. She only took one bottle, which quite cured her. I am sure every one ought to know of such a valuable remedy.

Yours truly,
T. COTTON.

Navigation Hotel, Tipton.

Mr. NEWTON-MASON, Dear Sir,—I have suffered for some considerable time with Indigestion and Sick Head-Ache, and have never had any medicine to do me so much good as Dr. Simes' Pepsine Mixture, which has completely cured me. Make any use of this you think proper, for the benefit of other people suffering from the same, as I think it is another blade of grass added to society.

Yours truly,
Mrs. WHITEHOUSE.

Great Cure of Flushes of Heat & Redness of the Face.

Mrs. F. UNFREYVILLE, of Caroline Street, Birmingham, writes:—For a long time I have suffered a great deal from Indigestion, Pains in the Side and Chest, also very unpleasant Burning and Redness in the Face after every thing I partook of. I bought a bottle of Dr. Simes' Pepsine Mixture from you, and am happy to state that it quite cured me. I am now as well as ever. It is the most excellent Medicine I ever took for it. I shall recommend it to all I know who suffer.

F. WAGSTAFF, Esq., Droitwich, writes:—Dear Sir,—I have suffered from Indigestion and Liver Complaint for a long while, and have paid £50 to one of the first physicians in Birmingham for advice and medicines, but obtained no relief. One bottle of Dr. Simes' Pepsine Mixture has done me more good than all the medicines I have taken.

Mr. C. BRITTON, 78, High Street, Birmingham, writes:—Your Dr. Simes' Pepsine Mixture not only sells well, but purchases also speak of it in the highest terms, some even declaring it has cured them after other things, tried for years, have failed, and amongst those prescriptions from various medical men.

Sussex House, Cambridge.

Mr. NEWTON-MASON, Dear Sir,—I have suffered for years from Indigestion, Head-Ache, and Pains in the Side, and have tried every remedy which has been suggested to me. I have consulted several physicians and surgeons, without receiving much benefit. A friend of mine gave me a dose of your Dr. Simes' Pepsine Mixture whilst suffering; I am sure it gave me ease in less than five minutes, so I bought a 9s 8d. bottle, which has quite cured me.

Yours, &c.,
CLARA PIKE.

DR. SIMES' PATENT LIVER PILLS,

THE ONLY CURE FOR BILE & LIVER COMPLAINTS.

PART I.

ERAS AND CYCLES.

The year of the Julian period 6592.

The year 5640 of the Jewish Era commences on September 18, 1879.

The year 1297 of the Mahomedan Era commences on December 15, 1879. **Ramadan** (month of Abstinence observed by the Turks) commences on August 19, 1879.

The Hindoo year 1286 commences on April 12, 1879.

CHRONOLOGICAL CYCLES.

Golden Number.....	18		Dominical Letter	F
Epact	7		Roman Indiction	7
Solar Cycle	12		Julian Period	6592

The Solar Cycle, or Cycle of the Sun, is a period of 28 years, in which all the varieties of the Dominical Letters will have happened, and they will return in the same order as they did 28 years before. This Cycle commenced nine years before the Birth of Christ.

The Lunar Cycle or Cycle of the Moon, commonly called the Golden Number, and sometimes the Metonic Cycle (from Meton, an Athenian, who invented it about 432 years before the Birth of Christ) is a revolution of 19 years; in which time, the conjunctions, oppositions, and other aspects of the Moon are within an hour and a half of being the same as they were on the same days of the months 19 years before. The prime, or Golden Number, is the number of years elapsed in this Cycle. At the Birth, the Golden Number was 2.

The Roman Indiction is a period of 15 years, used by the Romans for the time of taxing their provinces. Three years of this Cycle had elapsed at the Birth of Christ.

The Julian Period contains 7980 years, and arises by multiplying together 28, 19, and 15, being the Cycles of the Sun, Moon, and Indiction. This was also contrived as a period for chronological matters, and is assumed as a correct and fixed rule in calculation by all the Astronomers and Chronologers throughout the Christian world. Its beginning is supposed to have commenced 710 years before the usual date of the creation of the world, or 4714 before the commencement of the Christian Era.

When there are two letters together, the first is for January and February, the second for the rest of the year. In a line with the month, in the second part of the table, find the Dominical letter of the year, and down the same column with the letter find the day of the week, when the figures on the left will give the days of the month. Thus for the Mondays in January 1867. Opposite 1867 in the first column is F in the fifth. In a line with January find F, and descend the column to "Mon."—On the left are 7, 14, 21, and 28, the required dates.</p>

To find the age of any given day of any month.—To the number corresponding to the preceding month in this table, add the day of the given month; the sum will give the age of the day. For example:—To find the age of the 14th day of August—Take from this table the age of the last day of July (212), and add 14—total 226. In a Leap Year add one day to the date of the month, if after February.

* The use of this Table is too oblique to require an explanation. — Observe that by reason of the Refraction, the Sun appears to be much higher than it really is, and that so of the rising and setting is reckoned from the time when the body of the Sun is quite above the Horizon, it will be nearest the truth.

This is one of the most delightful months in the year. The days are cool, the mornings and evenings damp.

The Thermometer ranges in the shade from 52° in the morning to 65° in the afternoon

In the market will be found beef, mutton, veal, lamb, pork, kid, poultry, &c., of the best and most superior kind.

Game is to be had in great abundance—snipe, duck, teal, &c.

The fish market is well supplied at this season with beekty (the salmon of the East), moonjee, rowe, cutlah, quoyo, sowlee selliah, bhola, eels, banpattah, and many of inferior descriptions

Vegetables of all kinds are in the highest state of perfection; the markets abound with green peas, cauliflowers, cabbages, turnips, yams, potatoes, carrots, spinach, greens, cucumbers, radishes, celery, lettuces, young onions, knol khol, kochoo, French beans, seams, brinjalls, red and white beet, &c., &c.

The fruits in season are Sylhet and China oranges, loquats, plantains, pine-apples, sugar-canes, plums, guavas, country almonds, limes, and gooseberries.

The beginning of the present month is generally cool and comfortable, particularly if the northerly winds prevail; the weather afterwards becomes less pleasant, till a change of season takes place about the end of the month.

The Thermometer in the shade ranges on a medium from 58° in the morning to 75° in the evening.

Measles among children are very prevalent during the whole of this month.

The meat market continues good and abundant.

The fish market has the addition of the small hillsah (Indian mackerel).

The additional vegetables for this month are asparagus, pumpkins, and young cucumbers and fruits—custard-apples, mulberries, ball and small water-melons.

The weather gets warmer day by day. The Thermometer ranges in the shade from 68° in the morning to 82° in the afternoon. Various operations of husbandry generally commence this month as soon as the ground is moistened by rain ; this, however, sometimes happens at the latter end of February, but then it is occasioned by an unusual quantity of rain. The meat market continues good. Fish is in abundance, and the market has the addition of the gooteah, a small and well-flavoured fish. Green peas and turnips disappear this month ; salad, cabbage, carrots and celery are on the decline, but, asparagus and potatoes continue excellent ; green mangoes and unripe musk-melons are to be had, also amrah, greens, and water-cresses. Fruit is also plentiful—large water-melons appear about the middle of the present month, and continue in perfection till the middle of June. The north-westers with thunder, lightning, and rain generally commence about the termination of this month.

The beginning of this month is sometimes pleasant, particularly if the north-westers are frequent; but the middle and latter parts are disagreeable in the extreme, it is one of the bad months in the year. The Thermometer ranges in the shade from 80° in the morning to 90° in the afternoon and when exposed to the sun it rises to 110°.

This is an unfavorable season for meat which begins to be flabby and poor, the fat spongy and yellow. The fish market has the addition of the mango-fish, a sea fish, so called from its annual visit to all the Bengal rivers at this (the mango) season to spawn, it disappears about the middle of July. The carp and mahgoor can also be had in this month.

Potatoes, asparagus, onions, cucumbers, and few cabbage sprouts are the only vegetables to be procured. Water-melons and musk melons are in great perfection; there is not much fruit now to be had in the market. Green mangos for pickling, and caranda for tarts are in great abundance.

The present is considered the very worst month in the year, the heat being excessive. The Thermometer ranges in the shade from 85° in the morning to 95° in the afternoon; if exposed to the full influence of the sun's beams, it will rise to 130° and sometimes higher. The weather this month is most oppressive, especially the latter half; the wind continues southerly and the heat is scarcely bearable. Of all the months in the year the present is the most trying. The heat in the first half of the month is sometimes relieved by north-westers accompanied by refreshing showers. The meat market is very inferior to last month. The fish market continues good and abundant, the beekty excepted. Mango-fish is in great perfection this month. Asparagus, potatoes and cabbage sprouts with indifferent turnips, sweet potatoes, cucumbers, and onions are nearly all the vegetables now in the market; pumpkins and cucurbitaceous roots are, however, procurable. Grapes, peaches, pine-apples, limes, rose-apples, mangos, jack, lichees, star apples, wampees, together with water-melons, musk-melons, pomegranates, papias, custard apples, &c., &c., are in season.

The South-West monsoons with the periodical rains set in about the middle of this month
The Thermometer in the first part of this month rises frequently to 99° in the shade at noon; from about the 15th, if the rains commence, the heat subsides.

The weather throughout the whole of this month is pleasant or oppressive, according to the quantity of rain-fall; if the weather be dry, the heat is scarcely bearable; it is generally very close; not a breath of air from any quarter; but if the rains commence, as they are expected to do (in regular seasons) between the 10th and 20th of the month, the air is refreshing, and the weather not uncomfortable.

Meat, as must be expected, very indifferent

The fish market much the same as last month.

Asparagus and potatoes, onions and Indian corn are the principal vegetables that remain

Mangos and mango-fish are in great abundance and perfection. Bombay mangos can be had in the market this month; they come next to the Malda in flavor and quality. Grapes, peaches, liches, &c., disappear this month. Custard-apples, pine-apples, jack and guavas are in great perfection.

This month is attended with much rain, the winds are light and variable; weather frequently gloomy and sometimes stormy with heavy falls of rain, whilst at intervals, it is fair, mild, and the temperature agreeable. The Thermometer ranges in the shade from 80° in the morning to 89° in the afternoon.

Meat continues lean and poor.

The fish market continues good. The moonjce, the rows, the outia, the quoye, the sowlee, the mahgoe, the gree, the tangra, and the chunah are procurable all the year round. The bilca (or sable) fish makes its appearance this month; this fish is delicious either boiled, baked or roasted, but it is very rich. This fish when cured with tamarind forms a good substitute for herrings; it is then known by the appellation of the "Tamarind" fish.

The vegetable market is very indifferent—asparagus is in season, but potatoes become poor and watercress, young lettuces, cucumbers, and sweet potatoes are now procurable; also cumranga and corunja. Mangoes and mango-fish both disappear this month.

Fine apples, custard-apples, jacks, and guavas continue in season. The genuine Malda mango may be had this month; they are undoubtedly the best, and are large sized and rare to be had.

In the present month rain is most copious
 The Thermometer ranges in the shade from 8° in the morning to 90° in the afternoon.
 Light and variable winds prevail during the month occasionally thunder and lightning
 The meat and fish market much the same as last month.
 The vegetables procurable are salad, asparagus, cucumbers, brinjalls, muckun seam (a kind of French beans,) radishes, turnips, cabbage sprouts and some indifferent potatoes; Indian corn, cucumbers, spinage and such like are to be had all the year round, but they are tasteless, except at this season when they become firm and palatable.
 Pumplnose (shaddock) appears this month; pine-apples, custard-apples and guavas continue in perfection; avigato pear is sometimes procurable.

The rains commence to subside during this month.

The wind continues light and variable, attended with occasional cloudy weather.

Day and night equal on the 22nd of this month.

The Thermometer ranges from 80° in the morning to 85° in the afternoon.

The meat market much the same as last month.

The fish market experiences but slight improvement, for although there is abundance, yet it is not always firm and good, except the beekty, which becomes larger and better flavored. The following are also in the market: the bhola, dessy tangra, gonteah, bhengris, gongtorah, kowa-thontee, pyrah-chanda, and shell-fish (bagda chingree).

Vegetables are very indifferent; yams generally come into season about this time.

In the fruit market small oranges make their appearance, but are very acid. Custard-apples,

The first half of this month generally yields a good supply of rain, and the rainy season breaks up generally by the middle of the month.
 The thermometer ranges in the shade from 78° in the morning to 85° in the afternoon.
 The winds are in general light and variable during the month, veering from south to N. W., thence to north and N. E.
 As soon as the weather sets in fair, it is the proper time to commence gardening.
 The meat market begins to revive, and the fish market to improve, the beekty becomes firm and the other fishes proportionably good; snipes make their appearance.
 Vegetables and fruit continue much the same as last month till the latter end of the present month when, if the season is favorable, both experience a considerable improvement.
 Oranges become large and better flavored, and custard-apples continue in great perfection.
 Young potatoes sometimes make their appearance this month, but they have very little flavor; they are small and watery. Pomegranates are procurable, also kutball or wood apples.

The weather is clear and settled, and most delightful. This and the two following months can hardly be equalled in any other country for their mild and genial character.

Light northerly winds prevail this month.

The thermometer ranges from 70° in the morning to 75° in the afternoon.

The meat market looks wholesome; beef, mutton, veal, pork and poultry become firm and good.

Game comes in also this month in considerable quantities - wild duck, snipes, turkeys, &c.

Fish is procurable in abundance, such as beekty, banapattah, gongtoah, mingal, carp, and mango-fish, without rice.

The vegetable market begins afresh this month by the introduction of green peas, new potatoes, lettuce, greens of different kinds, spinach, radishes, and turnips.

In the fruit market may be had oranges, lemons, pumpkins, custard-apples, papias, plantains, coconuts, country almonds, pomegranates, kutbat, &c.

The Rupee weighs 180 grains Troy or 1 tolah and is composed of 11 parts of silver and 1 of alloy.

The Gold-mohur is of the same weight as the Rupee.

The Copper coinage consists of the $\frac{1}{2}$ anna piece or double pice, the $\frac{1}{4}$ anna or pice, the $\frac{1}{8}$ anna or half pice, the $\frac{1}{16}$ anna or pie. Copper coinage is not according to law a *legal tender*.

Cowries are small shells used in Bazaars for small payments, &c., and are reckoned thus :

4	Cowries, C. make	1	Gunda.	Gun.
5	Gandas ..	1	Booree.	Be.
4	Boorees ..	1	Pun.	Pn.

4 = 1 Gunda.

80 = 20 = 1 Pun.

1280 = 320 = 16 = 1 Kahun.

These rise and fall in their value according to their abundance or scarcity.

 April, June and November.
 February has twenty-eight alone,
 And all the rest have thirty-one.
 (Except in leap-year, at which time,
 February's days are twenty-nine.)

Every fourth year is called Leap-year, and consists of 366 days.—To ascertain if a given year is leap-year, divide it by 4, and if there be no remainder, it is leap-year: if there be a remainder, the number over shows how many years have elapsed since the last leap-year.

INTEREST TABLES.

FOR CURRENT GOVERNMENT SECURITIES.

Rules observed at the Treasury for the calculation of anticipated Interest on New Loans and Interest generally.

1. Interest to be paid by the month: each month to be taken as one-twelfth of a year, and to consist of thirty days or parts.
2. In cases where it may be necessary to calculate interest on the fractional parts of a month of thirty-one days, the extra day is to be struck out.
3. Application of above Rule to a Loan on which the half-yearly interest falls due on the 31st December and 30th June of each year.
4. A person subscribing on the 27th October would be entitled to Anticipation Interest from 27th October to 30th December, for two months and three days, thus:
 5. From 27th October to 26th December, for two months or two-twelfths of a year.
 6. From 27th to 30th December, three days or three-thirtieths of one-twelfth.
7. A person subscribing to the Loan on the 29th December would be entitled to only one day's Anticipation Interest, on the 30th he would not be entitled to pay.
8. A person subscribing to the three-and-a-half per cent. loan on any day in that month previous to the 28th February 1854, is entitled to interest from the day of subscription to the 27th February, both days inclusive, and for each day he will receive one thirtieth of one-twelfth—thus if he subscribes on the 3rd February, he will receive twenty-five-thirtieths, and if on the 1st February, twenty-seven-thirtieths of a month's interest.

PART II.
GARDENING.
GARDENER'S CALENDAR.
JANUARY.
VEGETABLES.

From this month forward vegetables of every kind will need to be constantly watered, and, if once or twice a week with liquid manure, all the better.

Water Squashes every day copiously.

Make sowings of Radishes, Mustard, Cress, Spinach, and Lettuce for a succession. In the Upper Provinces Peas may also be sown during this month; but not in Bengal. Sowings of Celery may now be made for young plants to preserve through till the following cold season, if thought worth the while.

Put out young plants of Cabbage and Knol-Kohl to fill up vacant places in beds. Put out young Celery plants for succession.

Celery will now be in a condition fit for earthing up to blanch.

Keep a few plants of Lettuce, Mustard, and Cress for seed. Reserve one or two of the earliest formed heads of Artichoke for seed in Bengal: it is not necessary to do so in Upper India.

The plants should now be taken up for the manufacture of Tapioca and Arrowroot.

FRUITS.

Strawberries will now be blossoming and fruiting, and will require to be well watered, and nets or other means provided to protect them from birds.

Water Loquats copiously.

Fig-trees, Peaches, Plums, and Grape-vines should now be pruned.

ORNAMENTAL PLANTS.

Commence giving surface-dressings of fresh cow-manure to Roses.

Chrysanthemums will have done flowering, and should be taken out of their pots, pulled to pieces, and put out in a nursery-bed for a supply of new plants.

The following plants will be much benefited by being well pruned in at this season:—

Allamandas.	Ixoras.	Malvaviscus arboreus.
Bignonias.	Jasminums.	Mussaendas.
Hamelias.	Jatropha pandurifolia.	Nyctanthes.
Hibiscus mutabilis.	Lagerströmias.	Quisqualis.
— rosa sinensis.	Lantanas.	Tecomas.
— Syriacus.		

FEBRUARY.

VEGETABLES.

Little can be done during this month in the cultivation of European vegetables, except copiously watering those that are already in the ground.

Sowings of Lettuce, Mustard, and Cress, may still be made.

To Peas that are reserved for seed, less and less water, if any, should be given as they ripen.

FRUITS.

Water Loquats liberally, as well as Peach, Plum, Lichee and Mango trees, as soon as the fruit is set.

Earth up and water pine-apples.

Fertilise Vanilla flowers.

Sow seed of Water-melon.

ORNAMENTAL PLANTS.

This is the best season for transferring such Orchids as require it to new pots or baskets.

Plants will be starting into growth, and should either have the soil in the old pots partially changed, or be potted afresh; they will now bear dividing, so as to make several plants out of one.

Re-pot or re-plant *Caladiums*, *Arum pictum*, *Manettia cordifolia*, *Cyrtoperla flava*, *Hibiscus Jerroldianus*, *Gloriosa superba*, and all such-like plants, that have been lying dormant during the cold season, as well as the several species of *Crinum*, *Globba*, *Pancratiatum*, *Alpinia*, *Hedychium*, *Hippeastrum*, and *Kaempferia*.

Put in the border *Petunias*, *Phloxes*, *Salpiglossis*.

Sow seeds of *Poinciana*, *Tecoma*, &c.

Pot off the choice kinds of *Roses* raised from cuttings laid down in November and keep them in the shade, well watered.

Roses now may be layered with success.

MARCH.

VEGETABLES.

About the middle of this month remove the soil from the stools of *Asparagus* and cover them over again immediately with fresh soil, well enriched with old manure, and commence watering copiously.

Take up *Carrots* and *Beet*, and store them in pots of dry earth for future use.

Take up and store *Onions*.

At the beginning of this month, in the Upper Provinces, seeds of American *Squash* should be sown.

The stumps of *Cabbages* that have been cut should be allowed to remain, and be watered, as by their sprouts they will afford nice gatherings for the table for some time to come.

Dry the leaves of *English Sage* and *Thyme*, and store in bottles.

Make sowings of *Parsley* in a shady place.

FRUITS.

Lichees will be ripening; cover the trees betimes with nets, to save the fruit from birds.

Well water *Peach*, *Plum*, and *Mango* trees, and *Grape-vines*.

Fertilise *Vanilla* flowers.

Cut back closely all wood, of last year's growth, of *Bâc* trees.

This is the season both in *Bengal* and *Upper India* for sowing the seeds of fine kinds of *Melons*.

Thin out *Plantains*, remove the soil from the roots, fill in with fresh cow-manure, and water liberally.

ORNAMENTAL PLANTS.

Withhold water from *Dahlia*s, and when the stems have died down, take up the tubers and store them in pots of earth or sand in a dry godown.

Treat in the same way the several species of *Oxalis*.

Withhold water from *Gloxinia maculata*, *Lilium longifolium*, and *Richardia Ethiopica*, and when the stems and leaves have died down, remove the pots with the bulbs within them undisturbed, to some dry godown, till the time of re-potting in the following October. Other bulbous and tuberous-rooted plants of a similar description should, of course, receive similar treatment.

Cut well back the wood of last season's growth of shrubs, such as *Poinsettia*, *Holmskioldia*, *Hamiltonia*, *Phlogacanthus*, *Aphelandia*, *Buddlea*, *Thunbergia*, and *Cassia ulata*, that have lately finished flowering.

Euphorbia jacquiniiflora should be treated in a similar way, and the cuttings inserted in pots of sand kept in a sheltered place and well watered: they will afford a nice stock of new plants.

Take up the choicest kinds of *Verbena* to pot, and keep under shelter during the Rains.

APRIL.

VEGETABLES.

Little can be done now in the cultivation of vegetables.

Well water *Asparagus*.

Gather seed of Onion and Salsify.

Put Yams in the ground and construct trellis-work for them to trail upon.

FRUITS.

Water Melons unremittingly.

Keep Strawberry-plants watered while the Hot season lasts.

ORNAMENTAL PLANTS.

The leaves of Gladiolus and some other bulbous plants will be dying down. The pots containing them should be removed to some dry place, where they may remain till the time for re-potting comes round again.

Achimenes, which at this time will be starting into growth, should be potted and well watered as soon as they appear above ground.

MAY.

VEGETABLES.

Asparagus will now be in season, and the beds must be kept most plentifully watered.

Lettuce may be raised in a shady place from acclimated seed. Beyond this there is nothing that can be done as regards European vegetables.

At the close of the month is the proper time for sowing most native vegetables; the several kinds of country Beans, Cucumbers and other Gourds; of Maize, Ochro, Brinjals, &c.

This is the period likewise for planting Ginger, Arrowroot, Jerusalem Artichoke, Kuchoo or Ghoyan, Sweet Potatoes, and the Tapioca plant.

FRUITS.

Continue to water Pine-apple.

This is the proper season for inarching and making gootees or layers of all the different kinds of fruit-trees.

ORNAMENTAL PLANTS.

There is little to be done in this department besides watering abundantly young and choice plants.

JUNE.

VEGETABLES.

Maize and the ordinary country vegetables may still be sown. There is nothing that can be done as regards European vegetables.

FRUITS.

Seeds of Mango should now be sown for a supply of stocks for inarching upon.

The operations of gootee, layering, and inarching may still be carried on, and cuttings laid down to strike.

ORNAMENTAL PLANTS.

The slips of Chrysanthemum laid down in January will now have become large plants. They should be taken up from the nursery-bed and pulled apart; and each rooted slip be potted in a single pot, and those of the choicer kinds put under shelter before the heavy rains set in.

For potted plants, which are to be left exposed to the weather during the Rains, bricks should be laid whereon the pots may rest out of access from worms.

At the end of this month cuttings of most tropical plants may be put down for striking.

As soon as the Rains have set in, examination should be made to ascertain where plants are liable to suffer from the lodgment of water around them, and the speediest means that can be devised be taken for draining it off.

JULY.

VEGETABLES.

During this month sowings of most native vegetables, such as Brinjals, Ochro, Pulwuls, Cucumbers, and the different kinds of runner Beans and Gourds may be continued.

Arrowroot, Ginger, Turmeric, and Jerusalem Artichokes about this time will require earthing up.

FRUITS.

The crowns of Pine-apples, of a fine kind when wrenched off should not be thrown away, but inserted in pots of sand under shelter. If watered regularly, they will soon form beautiful healthy plants.

This is the best time for budding Peaches, Plums, and trees of the Orange and Lemon tribe.

Sow Indian Sorrel and Cape Gooseberry.

ORNAMENTAL PLANTS.

At this season sow seeds of-

Amaranthus.	Ipomœa rubro-cœrulea.	Quamoclit.
Calonyction.	Martynia diandra.	Sesamum.
Carthamus.	Nicandia physaloides.	Spilanthes oleracea.
Cockscombs.	Nicotiana.	Sunflowers.
Dahlia.	Pentapetes phœnicea.	Zinnia.
Datura.		

On examining Dahlia tubers that have been stored away in pots of earth or sand it will very likely be found that they have begun to make shoots; if so, they should be potted immediately.

Gloxinia maculata will now require to be re-potted.

Now is the most favorable time for budding Roses.

This is the most successful season for striking cuttings of all tropical plants, which can be propagated in that way.

Cuttings also of Rose Edouard, Devoniensis, and the China Roses will strike at this period.

AUGUST.

VEGETABLES.

Sowings of Celery should now be made in pots, under shelter from the Rains. The seed will be slow in germinating; but it is important that plants should be brought as forward as possible for planting out when the Rains are over in October.

At this time also Asparagus-seed should be sown, for a supply of plants to make new beds within October, if needed.

Sow the small kind of Tomato.

FRUITS.

It will be found that Peaches, Plums and the Orange and Lemon tribe, may now be budded successfully.

Cuttings also of the Orange tribe now laid down will strike readily.

The fruit of Guavas, Custard-apples, and Pomegranates should be tied up in fine muslin, to protect them from the attacks of birds and vermin.

Now is the season for planting out suckers or offsets of Pine-apples.

ORNAMENTAL PLANTS.

Roses may be budded successfully during this month.

Stephanotis floribunda and many of the choicest tropical plants may now be propagated by cuttings in sand under glass.

SEPTEMBER.

VEGETABLES.

Make sowings of Patna Pea.

Commence sowings of Cauliflower, Cabbage, Knol-Khol, and Artichoke in pots under shelter, or on a raised piece of ground under a hooga, in order to have plants well forward for putting out in the open ground as soon as the Rains are over.

FRUITS.

Peach-stones, sown now, will come up in February, and afford stocks for budding upon in August.

Prune away the lowermost leaves of Cocoa-nut-trees.

ORNAMENTAL PLANTS.

Sowings of German Aster, Heartsease, and Cineraria should be made this month, as these plants take a long time to mature for blossoming favorably.

At the beginning of this month sow Balsams.

Richardia Ethiopica and the several species of Oxalis will now be moving. They should be potted and brought to the light immediately they appear above ground.

This is the season for a general pruning of Rose-trees.

OCTOBER.

VEGETABLES.

As soon as the Rains are well over, no time should be lost in preparing the ground and making sowings of Turnips, Carrots, Peas, Beans, French Beans, Lettuce, Tomato, Spinach, Endive, Salsify, Mustard, Cress, Radishes, Beet, Onions, and Leeks.

Sow in Bengal English Cucumber-seed and American Squash.

Put out in their places in the open ground young plants of Cauliflower, Cabbage, Knol-Kohl, Artichoke, and Asparagus.

FRUITS.

Now is the season for making up Strawberry-beds and putting in the plants. In the Upper Provinces gather Putwa, before it is injured by the cold.

Sow Seeds of

Almonds.	Guava.	Plums.
Avocado Pear.	Hog-plum.	Pumplenose.
Bencoolen Nut.	Khirnee.	Strawberry.
Cowa-mangosteen.	Lichee.	Wámpee.
Custard Apple.	Peaches.	

ORNAMENTAL PLANTS.

About the middle of this month is the time for making sowings of all the English Annuals, either in pots or on a raised border under a hooga.

Pots containing bulbs of *Lilium longifolium* should be well soaked with water; and about twelve hours afterwards, the soil being thus rendered perfectly loose, the bulbs should be carefully taken out and re-potted.

This is the best time for imported bulbs to arrive for potting, such as Hyacinths, Anemone, Ranunculus, and the several kinds of Narcissus, Iris, Ixia, &c.

Re-pot

Aloysia citriodora.	Geraniums.	Lophospermum.
Antirrhinums.	Geum.	Pinks.
Carnations.	Habrothamnus.	Plumbago rosea.
Centradenia.	Heliotrope.	Scabious.
Columbine.	Hydrangea.	Sweetwilliam.
Daisies.	Iris.	Verbenas.
Fransciscea.	Linum.	Violet.

In Upper India repair the paths.

NOVEMBER.

VEGETABLES.

Make successive sowings of Peas, French-Beans, Turnips, Carrots, Radishes, Lettuce, Beet, Mustard, and Cress.

Thin out betimes Turnips, Carrots, and Beet.

Make successive plantings of Cauliflowers, Cabbages, Knol-Kohl, Lettuce, and Celery.

Stick Peas before they begin to fall about.

Earth up Potatoes.

Yams are now fit to be taken up for use.

Plant out Onion-bulbs for obtaining a crop of seed from in April.

Take up Mint and plant it in a fresh soil, well enriched.

FRUITS.

By the end of this month it is well to lay open the roots of mangoes, and also of peaches, plums, and grape-vines, and to withhold water entirely, in order to accelerate the fall of the leaf and the ripening of the bearing wood.

ORNAMENTAL PLANTS.

This is the best season for putting down cuttings of all kinds of Roses, and indeed of most exotics, natives of a colder climate.

The several species of Camma may now be dug up, parted, and planted in fresh ground.

DECEMBER.

VEGETABLES.

Make sowings of Radishes, Mustard, Cress, Lettuce, Peas, and French-Beans for succession.

Put out fresh plants of Knol-Kohl, Cabbage, Cauliflower, and Celery.

The most advanced crops of Celery will be now in a condition for earthing up to blanch previous to use.

Water well Celery, Squashes, Radishes, and Asparagus seedlings.

Withhold water from old Asparagus plants, that they may die down and go to rest.

FRUITS.

Gather Roselle.

Well water Cape Gooseberries. In the North-West Provinces the plants should be covered in at night during the cold months, or they will be much injured by the cold, and the fruit will not ripen.

Place seedling Bilimbis in a warm sheltered place during the cold months.

Prune Fig-trees, Peaches, and Grape-vines.

Towards the close of the month cover again the roots of fruit-trees that had been exposed, with fresh well-enriched soil.

ORNAMENTAL PLANTS.

Put down cuttings of *Aloysia citriodora*, *Heliotrope*, *Geranium*, *Pinks*, *Carnations*, *Habrothamnus*, and *Verbenas*.

Allow to dry down *Arum pictum*, *Gesnera tubiflora*, *Spreckelia*, the varieties of *Caladium*, and such-like potted bulbous plants.

In the North-West Provinces cover over at night, to protect from frost, young *Heliotropes*, *Tropæolums*, *Canary Creeper*, and seedling *Menhdee* plants.

Keep under the shelter of a warm verandah *Ixora Javanica*, *Hoyas*, and *Vanilla* plants, that are in pots.

Make succession sowings of such quick-growing things as *Browallia*, *Linaria*, *Cuphea Mignonette*, *French Marigold*, and *Convolvulus Major*.

German *Asters*, *Cinerarias*, and *Pansies* will require re-potting in a richer soil.

NOTES ON SOME ORNAMENTAL PLANTS;
SHRUBS AND TREES.

[The preceding Calendar and the following Notes, the Compilers beg to state, are extracted from Firminger's *Manual of Gardening for Bengal and Upper India*.]

ANNUALS.

FEW persons, perhaps, who in this country care to cultivate a flower-garden at all, would be willing to dispense with Annuals.

For those who do not desire to cultivate more than a limited few, I subjoin a list of such as are never likely to cause disappointment in flowering, if only the seed prove good and germinate.

<i>Acroclinium roseum.</i>	<i>Delphinium.</i>	<i>Mimulus.</i>
<i>Ageratum Mexicanum.</i>	<i>Dianthus Chinensis.</i>	<i>Nemophila insignis.</i>
<i>Aster Chinensis.</i>	<i>Didiscus caruleus.</i>	<i>Petunia.</i>
<i>Brachycome iberidifolia.</i>	<i>Gaura Lindheimeria.</i>	<i>Phlox.</i>
<i>Browallia elata.</i>	<i>Iberis.</i>	<i>Portulaca.</i>
<i>Cacalea coccinea.</i>	<i>Ipomœa limbata.</i>	<i>Reseda odorata.</i>
<i>Calendula pluvialis.</i>	<i>Linaria.</i>	<i>Rhodanthe Manglesii.</i>
<i>Calliopsis, of sorts.</i>	<i>Linum grandiflorum.</i>	<i>Salpiglossis.</i>
<i>Callirhoe digitata.</i>	<i>Lobelia ramosa.</i>	<i>Tagetes, of sorts.</i>
<i>Centranthus macrosiphon.</i>	<i>Lupinus, of sorts.</i>	<i>Topœolum, of sorts.</i>
<i>Cuphea purpurea.</i>	<i>Malcomia maritima.</i>	<i>Whitlavia grandiflora.</i>

The following is a list of those the seeds of which should be sown in June and July :

<i>Amaranthus tricolor.</i>	<i>Desmodium gyrans.</i>	<i>Nicotiana, of sorts.</i>
—caudatus.	<i>Exacum tetragonum.</i>	<i>Nicandra physaloides.</i>
—hypochondriacus.	<i>Gomphrena Globosa.</i>	<i>Pentapetes phœnicea.</i>
<i>Carthamus tinctorious.</i>	<i>Hibiscus giganteus.</i>	<i>Quamoclit vulgaris.</i>
<i>Celosia cristata, and</i>	—Lindleyi.	<i>Sesamum Indicum.</i>
varieties.	<i>Ipomœa rubro-cœrulea.</i>	<i>Splanthes oltracca.</i>
<i>Crotalaria juncea.</i>	<i>Martynia diandra.</i>	<i>Zinnia elegans.</i>
<i>Datura, of sorts.</i>		

In the case of most Annuals the time for sowing the seed is when the rains are over, about the middle of October. In the Upper Provinces the sowing should take place as soon as the abatement of the heat will allow, in order that the seedlings may be well advanced before the weather sets in at its coldest, during which period they remain quite stationary, making little or no growth whatever. Nasturtiums, for instance, with the pretty Canary Creeper, must be sown in time to make a good growth before the frosty nights come, when they have to be carefully protected from the cold. If the sowing be deferred till the cold season is over, the plants will be killed by the approach of the Hot season before they have put forth a blossom.

In Bengal again there are certain of the Annuals which take the whole of the time that the cold weather lasts to complete their growth, and only come into blossom just at its close. If the seeds of such kinds be not sown very early, it amounts almost to a certainty, that the plants will die without flowering. Among these in particular may be mentioned *Cineraria*, German Asters, *Jacobaea* and *Salpiglossis*.

Others on the other hand, blossom within a much shorter period; of such it is advisable always to reserve a portion of the seed for sowing in November. Among these may be mentioned more especially *Nemophila* and Larkspurs, the seed of which will not germinate till the weather has become quite cold, and when sown early is liable to be lost before germinating.

Sowing Annuals in pots is, no doubt, the more sure and economical plan; for in that case the seeds are comparatively safe from the ravages of ants, of all things the most to be guarded against.

It is essential that the soil used should be of a loose description, so that there be as little risk as possible of breaking the tender thread-like roots of the seedlings in the process of what is called "pricking out." No better compost can be used than that recommended by Mr. Ross for the purpose, consisting of

Leaf mould	8 parts.
Common mould	8 parts.
Sand	1 part.

The seeds when sown should be covered with nothing more than a mere sprinkling of soil, pressed down upon them gently with the hand.

It is of the utmost importance that the seedlings should from the very first, have during the day, all the light and air that can possibly be given them short of absolute sunshine, and at night, when the weather will admit, be put out in the open air to receive the dew.

The mode of raising Annuals, however, attended with least trouble is to select a small plot of ground just of sufficient size for the purpose; well dig it, and make it very light

and mellow with vegetable mould, and perfectly level. Then divide it off into little compartments, and in each sow a different kind of seed, and affix a label. But a better plan yet, in my opinion, is to draw drills over the plot at the distance of half a foot between each drill, and sow in them the different kinds of seed in succession. It is thus known exactly where to look for the seeds to come up; when up also they are far more easily transplanted from drills than when the seed has been sown broadcast. Still, whichever plan is adopted, the whole plot must be sheltered from the sun during the day, and in bad weather at night, with a covering of hoogla, supported on a bamboo frame about three feet from the ground. About four-and-twenty hours previous the soil should be well drenched, so that at the time of sowing, without being wet and cloggy, it may be found moist and mellow.

"Annuals," says Sir J. Paxton, "with the exception of a few particular sorts, all will derive great benefit from being transplanted. It will check the natural exuberance of their growth, and promote the production of flowers." "I am convinced," says Mr. M'Meckin, head gardener formerly to the Agri-Horticultural Society, "that annuals in this country are improved by transplanting."

As a general rule for guidance in this matter, I have observed, with regard to all herbaceous plants, as well as Annuals, that those which love a rich damp soil, such as *Mimulus*, *Nemophila*, German Aster, *Cineraria*, Balsams, &c., in no way suffer, but are rather benefited by transplantation; while those plants the natural locality of which is a dry, arid soil, such as *Lupinus*, *Portulaca*, *Poppy*, *Eschscholtzia*, *Mignonette*, &c. suffer severely and often irrecoverably from the process.

Seeds of Annuals, such as it has been stated suffer too great a check from being transplanted, may, especially when seed is plentiful, be very advantageously sown at once in the border on the spot where they are to remain.

The seed must not be cast merely on the hard, dry soil of the border, but a little mellow leaf-mould or old well-decayed cow-manure be mixed up with the soil on the spots where the sowings are to be made.

Annuals in the border require daily watering.

FERNS.

In my opinion nothing can surpass in beauty a choice assortment of these plants tastefully arranged and in a healthy condition, and it seems strange that the ornamental glass Fern-cases, now so common in England, have not been introduced generally into the halls and drawing-rooms of Calcutta, to which they would be admirably adapted. "Ferns of many kinds," Mr. John Scott observes, "may be grown in Betle-houses, but for a general collection of tropical species glass structures are absolutely necessary, in order that their young and tender fronds may be shielded from the scorching influence of the atmosphere throughout the Hot season." There are notwithstanding several species which will thrive satisfactorily enough under the shade of a verandah among other potted plants, and it is by the contrast afforded by their foliage there that their beauty and grace can be more specially recognised perhaps than in any other situation. To confine them to Betle-houses, if intended for decoration, is unquestionably to sacrifice in a great measure the object for which they are grown.

The soil in which, according to my experience, Ferns thrive best is a mixture of coconut fibre and leaf-mould with sand. Mr. John Scott recommends a compost, one-half pieces of charcoal of about the size of a bean, and equal parts of vegetable mould, sand, and potsherds, and that repotting should be done in the cold season.

They are usually grown in pots. Place three or four large pieces of brick at the bottom of the pot, so as to fill it more than a third way up. Upon these lay the coconut fibre, scattering it over with leaf-mould as the pot is gradually filled to the top. The Fern may then be planted, and a few large pieces of brick should be laid on the surface of the soil to keep it fixed and steady. With few exceptions they may be multiplied easily by division.

Ferns may also be raised from seed. The plan perhaps best to be pursued is to fill a shallow pot with the materials and in the manner just described, finishing with a smooth layer of sandy leaf-mould within an inch of the top. Lower the pot into water to the rim, till the water, rising through the hole at the bottom of the pot, soaks the whole of the contents. Then take it out, scatter the spores lightly over the surface, and cover with a piece of glass. When the soil appears to be getting dry dip the pot again into water as before;

ORCHIDS.

For the successful cultivation of the larger part of this peculiar and delightful race of plants an atmosphere either naturally humid, or rendered so artificially, is absolutely essential. In the arid climate of the Upper Provinces it is hopeless to attempt to grow them, and even in the comparatively damp region of Bengal their culture is attended with no more than what may be called partial success. The Khassya Hills, Nepal, Assam, Java, and the locality of the Straits, are the native districts of large numbers, where the air is almost constantly saturated with moisture, and where they flourish in all their vigour and loveliness. In the locality of Calcutta there are a certain few only that can be cultivated with much satisfaction. Numbers, it is true, have from time to time been introduced and been seen to blossom beautifully; but it would be difficult as well as useless to enumerate them, as they have been here but the one season and gone the next. More especially may this perhaps be said of many of the superb species from tropical America and the Brazils which have been imported of late years. These for the most part live in a lower temperature than they can obtain in this country; and their cultivation with success is as yet uncertain.

The following directions for propagating them equally applicable here as elsewhere are given by Mr. B. S. Williams in his work. 'The Orchid Grower's Manual'.—

"Some are easily increased by dividing them into pieces, or by cutting the old pseudo-bulbs from the plants after the latter have done flowering. Such plants as *Dendrobium* are increased in this way. The best time for this is just as they begin to grow, or when they are at rest. They should be cut through with a sharp knife between the pseudo-bulbs, being careful not to harm the roots. Each piece should have some roots attached to it. They should be parted and potted, and receive no water till they have begun to grow.

Dendrobium nobile, *D. Pierardii* &c. are propagated :—

"1. By bending the old pseudo-bulbs round the basket or pot in which they are growing.

"2. By cutting old flowering-bulbs away from the plant; laying them on damp moss, and, when they make roots, potting.

Dendrobium Aggregatum, *D. Densiflorum*, and similar, are increased by dividing the roots
Aerides Vanda, *Angreecum Saccolabium*, *Reranthera*.

"1. cut off the top of the plant, just below the first root.

"2. Take young growth, from the bottom of the plant.

Epidendrum, *Cymbidium*, *Calogyne*, *Cattleya*, *Bletia* and many others.

"Divide into pieces with portions of the roots attached, and a young bulb on the pseudo-bulb."

The period of the year when the plants are at rest is the same here as in England that is to say, from the beginning of November to the end of February. The close of this period is considered the fittest time for repotting them,—just as they begin to start into growth. Some, however, consider the month of June or July preferable for the purpose. Previous to potting it is laid down as indispensable that they receive no water for a few days. They should be elevated somewhat above the level of the pot. The principal point to be attended to is that they be provided with thorough drainage, for it is said that "although the plants are fond of moisture they never thrive, except the water has a free passage through the pot." But in connection with this it must also be remembered that here when they are in the condition of most vigorous growth it is the driest period of the whole year. At this season, therefore, when they are most craving of moisture, frequent waterings must be given them, to counteract the perfect state of dryness to which such through drainage would soon reduce them. And herein indeed seems to consist the main difficulty in their cultivation—the making the drainage effectual, and the compensating, by a seasonable fresh supply of water, for that which by evaporation and drainage is so soon withdrawn. The difficulty is removed of itself when the Hot season is over and the Rains have set in: but then a difficulty of just the opposite tendency occurs. The plants now do not dry soon enough; damp stagnates, and mouldiness and rot ensue. The remedy is obvious,—abundance of fresh air, and all the ventilation possible.

For watering Orchids, when the collection is large, a brass syringe, made for the purpose, is all but indispensable. They for the most part rest from growth during the two or three months of the Cold season, previous to which watering should be gradually more and more abstained from.

Different modes of growing them are adopted, suited to the peculiar habit of each. Some thrive best fastened with moss upon the bough of a tree or upon a log, some in open work baskets of wire or wood, and some few in pots.

When grown in pots, the system given by Sir J Paxton, as that adopted by Messrs. Rollinson, is as follows :—

“Take a pot somewhat smaller than the one in which the plant is to be placed Turn it upside down in the bottom of the said pot. This tends to fill up the pot, and assists the drainage very much—a very important object, as these plants will not thrive at all if allowed to become saturated with water. Put large pieces of potsherds into the bottom of the pot, then above these smaller pieces, then a layer of peat, and potsherds in succession till the pot is filled. On these materials the plant is placed.

“It will be loose and ready to tumble over, if of such kinds as Cattleyas or Dendrobiums to prevent which, thrust into the compost some stout sticks; and tie each pseudobulb to each stick firmly. These will secure the plant, and give it a neat, tidy appearance.

When grown in suspended baskets, the materials with which the baskets are filled will be much the same as those employed in the system of potting above given. Peat, however, such as used in England, is not to be obtained in the plains of this country; therefore what comes nearest to it, leaf-mould, with which cocoa-nut fibre is well-intermixed, must be made use of in its place. Mr. John Scott informed me that the material he used was charcoal and cocoa-nut fibre exclusively with no crocks.

For many, lighter kind of material than the above mentioned should be employed, *Aerides*, *Vanda*, *Saccolabium* *Vanilla* *Epidendrum nocturnum*, and *Dendrobium formosum*, thrive better in moss than in soil.

THE ROSE.

Those who are really fond of “the Queen of flowers,” and desire to possess a collection of the finest Roses, I most strongly recommend to procure them direct from England. There is no other way of obtaining them so cheaply or so satisfactorily. Most persons here who possess choice Roses seem anxious to keep them as much as possible exclusively to themselves; and the few choice ones which native dealers have at their disposal, including the now not uncommon one *Elise Sauvage*, they sell at as much as four or five rupees a plant—more than twice the cost at which they can be imported.

It is generally supposed that the procuring of Roses from Europe is attended with considerable expense. This is a great mistake. “Dwarfs,” by which are meant Roses on their own roots, as those are called that are raised from cuttings or layers, as well as those which are budded on the stocks beneath the soil, and “Dwarf-Standards,” as those are called which are budded on stocks under two feet high, mostly cost a shilling each, and none except the very newest, that is, such as have been produced within the last two years, cost more than eighteen-pence. The cost of conveyance by Peninsular and Oriental Steamer of a package containing about fifty Roses is 2*l.* 14*s.* For case and packing the nurseryman charges 5*s.* There is no duty upon them. From these items, then, it will be seen that for sixty rupees (6*l.*) a package of fifty of the finest Roses grown may be obtained.

The layering of many Roses may be performed at all seasons of the year, but with some few of the choicer kinds, such as *Glorie di Dijon*, it will prove most successful in February.

Mr. Errington very kindly communicated to me the following happy method he has adopted for layering Roses. He plunges a pot filled with soil in the ground, at the place where the layer is to be made, and layers the Rose in the usual way. This is done in February, shortly before the Hot season. He then places another pot upon the soil of the pot in which the layer has been made; half fills this upper pot with earth, and keeps the remaining half always filled with water. The water slowly trickles down to the layer below and keeps it constantly moist. The layer is ready to be cut by the beginning of the Rains.

The best season for lying down cuttings of Roses is undoubtedly in November. By March they become nice little rooted plants, and may then be taken up and potted off. Cuttings of vigorous and healthy growth from the Tea-Roses *Devoniensis* and *Elise Sauvage* will, I have found, strike readily if put down in July during the Rains.

I am indebted likewise to Mr. Errington, Head Gardener of the Agri-Horticultural Society, for the following particulars respecting his mode of raising Roses from cuttings. To strike them in he uses a mixture of one part of fine charcoal to three of sand. One advantage of this mixture, he says, is that the cuttings when struck, will continue growing and thriving; but that when struck in sand alone, they must be removed and potted in soil, or they soon die. He always uses slips with heels of the old wood. He takes care to lay the heel of the slip against the side of the pot, but not the whole length of the slip. He says the mixture cannot be pressed too closely round the slips. He covers them with a bell-glass.

During one Cold season I made experiments on striking cuttings of Roses in bottles of water. The ones I attempted were the delicate Tea-roses *Devoniensis*, *Elise Sauvage*, and *Peel's Rose*, and with each I met with complete success. The following I found the points essential to be attended to :

The water must be perfectly clean and pure, and changed frequently to keep it so. Not more than one or two slips must be put in the same bottle, or the water will become corrupt and the slips rot.

The slips must be of the youngest growth, foot-stems of a flower that has just blossomed and fallen off.

The bottles should be placed on the north side of the house, or behind some screen where they may have plenty of light without sunshine, and be sheltered from wind. An old box, without the lid, laid upon its side with the outer surface of the bottom facing the sun, serves admirably for putting the bottles in.

Small vials do not contain water enough; ten-ounce confectionery bottles should be used; tumblers will do, but are rather inconvenient.

It is exceedingly interesting to watch the cuttings gradually from their callus, as they will completely do in about three weeks, and then some time after emit one or two white silvery fibrous roots. As soon as they do this they should be potted off at once.

The budding of Roses is performed with the greatest facility and success in the Upper Provinces, and by this method choice Roses may soon be multiplied there to any extent. The kind employed for a stock is the *Rose Edouard*, which grows there with great vigour, the bark yielding most freely to receive the bud. The operation may be performed in March, but much better at any time during the months of July and August.

In Bengal, from the difficulty of finding a stock the bark of which will separate freely, from the wood, budding is seldom or never attempted; I have not the least doubt, however, that by a proper way of proceeding, budding may be resorted to there also as one of the most ready and satisfactory means of multiplying choice Roses.

When one has become possessed of buds of any valuable Rose an efficacious way of turning them to account would no doubt be, by sacrificing any common young Rose plant by cutting it completely down, removing the soil, and inserting the buds upon the stump or upon the root, the bark of which will always yield readily.

Grafting, or more properly inarching, is the practice that has been almost uniformly adopted in Bengal for the propagation of the choicer kinds of Roses,—in my opinion a very inferior mode of proceeding. The stocks employed for this purpose in the garden of the Agri-Horticultural Society are of the *Rosa gigantea*, and the *China Rose Duc de Berri*.

Roses, raised either from cuttings or layers, will come into full perfection of bearing by the second season after they have been planted out, particularly if they have received liberal treatment. They do not like a wet, undrained soil, and as little do they like a dry and arid one. It is therefore best to plant them in a gently raised bed, from which the superabundance of wet during the Rains may pass off; but as a situation of this kind subjects them to a greater degree of drought during the hot months, they must, at that season be, from time to time, liberally supplied with water.

General Jenkins, in his MS. notes gives the following plan:—"To make Roses blow every month: Have the roots taken up with plenty of earth before they are usually pruned and let them stand without water till they lose their leaves. Then give just enough to keep them alive, and when you wish them to blow plant them in good mould. Pruned and watered a little they will blow in six weeks."

I can to some extent certify from my own experience to the efficacy of this plan. Roses love now and then an entirely new soil, and transplantation every year or two is the very best thing that can be done for them. When not transplanted, they should in October, after the Rains are over, have their roots laid bare by the removal of the earth for two or three weeks, and then covered in with new soil well enriched with old cow-manure.

Surface-dressing during the months of December and January I have found of prodigious benefit, making the plants break forth with wonderful vigour. Drawing the earth away from the stem, so as to form a circular ridge at a foot's distance around it, I throw into the shallow basin thus formed a basket of fresh cow-dung, and from a considerable height pour water upon it. The water thus passes into the soil as a thick liquid-manure. A fresh quantity of cow-dung is applied at the interval of about a month.

When well-cultivated, Roses appear to me to thrive and blossom far more satisfactorily in the open ground than they do in pots. A common mode of cultivating Roses, and one of which the natives are very fond, is to grow them in ring-pots. These are earthen cylinders sixteen inches in diameter and two feet long, let into the earth endwise about a foot deep, and filled with soil to within three inches of the rim. The method of the natives is to cut the Roses, planted in these completely down, to within two or three inches

of the roots in October; a week or two later to remove the soil from the roots, and having left them exposed a few days, to fill in with a solution of oil-cake, of the consistency of thick mud, very offensive to the nose at the time. The plants under this treatment it is true blossom very beautifully a month or so afterwards, but it is a mode of cultivation that possibly would not suit every one's taste.

PLANTING, TRANSPLANTING AND CUTTINGS.

PLANTING consists, for the most part, in transferring young shrubs or trees from the pots in which they have been growing, into the places in the open ground where they are permanently to remain. This with many plants of a robust nature may be done almost indifferently at any season. But the two seasons more especially suited for the operation are at the setting in of the Rains, and at the commencement of the Cold season. As a general rule it may be laid down that plants natives of this country are planted out most successfully just previous to their breaking for their summer growth, a little after the commencement of the Rains; while plants natives of a colder climate, and that are in the greatest vigour of growth during the Cold season as Roses, for instance, should be planted about October. Most plants of the former class may, however, be planted out in February, but in that case those of a less robust habit demand a vast deal of attention, both in sheltering them from the sun, and in keeping them well watered during the hot months.

The usual method with *mallee*, if not looked after, when planting out a young shrub or fruit-tree, is to dig a hole in the ground only just large enough to receive the ball of earth in which the roots are contained; whereas the proper plan is to dig the hole as much as two feet in diameter, and a foot and a-half deep for moderate sized shrubs, and proportionately larger for those of a larger size and for fruit-trees. The soil that is taken out should be broken up somewhat small, and mixed with old stable refuse, decayed cow-dung, and rotten leaves, and then thrown into the hole again. If the ground be then drenched with water for a day or two previous, it will sink to the level at which it will remain, and the plant may be put down at once as its proper height without any fear of its crown becoming buried beneath the soil by subsequent sinking, as might otherwise happen. The plant should be copiously watered at the time, and for some little time afterwards, when the soil becomes dry.

TRANSPLANTING.—There are few things in which the *mallee* will manifest his indolence more than when employed in transplanting. If not keenly watched, he will, to make easy work of it, begin digging round the plant almost close to the stem so that the ball of earth he has to take up be as small as possible, cutting through or tearing away all the large long roots that come in his way, rather than extracting them carefully out.

In lifting a plant great care, and often much patience, are required, so that the roots sustain the least possible injury. It will sometimes however, unavoidably happen that the roots become so much broken or disturbed in the operation that the plant would suffer severely, if removed at once to the spot intended for it and immediately exposed to the sun and air. In such case it will be found advantageous to put it into as small a pot as will contain it, fill in the pot with soil, and well water it; then convey it to a darkened room, and keep it there during the day, bringing it out in the evening to remain in the open air and receive the benefit of the dew during the night. After a few days it may be left out in some well shaded spot during the whole day, and in no great length of time when its wounded roots have become healed, it will bear any amount of exposure. It may then be shifted from its pot and planted in the place where it is intended to remain. The worst it will have suffered will be the temporary shedding of its leaves merely.

CUTTINGS.—Some plants may be propagated by cuttings at nearly all times of the year, but the majority most successfully in the Rains. Some of our choicer plants, natives of a cold climate, and that are in vigorous growth only in the Cold season, cannot be multiplied by cuttings successfully except at that season.

Some cuttings strike so readily that it is almost immaterial how they are put into the ground. But most cuttings, it has been ascertained, strike more readily by being inserted slopingwise in the ground, than when they are planted upright. Indeed, it is well to lay them so slopingwise, that their summits go not more than an inch high above the ground, and then earth up, and cover all but the two uppermost buds. The cuttings thus protected are not nearly so liable to become dried up and to perish as when almost their whole length is left exposed to the air.

The end of the cutting which is to be inserted in the soil should be cut across with a clean cut just below a leaf bud. Some gardeners are of opinion that slips strike more readily than cuttings. A slip is a small shoot pulled off a plant at its point of junction with the stem bringing away with it a heel of wood and bark from the stem.

None of the leaves, or as few as possible, should be removed from the upper end of a cutting.

METHODS OF STRIKING AND SOIL.—A large number of the plants kept for distribution in the gardens of the Agri-Horticultural Society are raised from cuttings laid down in common garden-soil during the Rains in an open situation without shelter either from sun or wet weather, and possibly a situation thus exposed to the full action of the atmosphere is the very best for them; for of all things, most baneful to cuttings is that tendency in the earth to become sour, which occurs during the Rains in situations at all sheltered and secluded. The native nurserymen I have observed, to strike their cuttings, make use of a mellow soapy description of clay seemingly the substratum thrown up in the cleaning of tanks. This appears to be singularly tenacious of wet and yet to have no tendency whatever to turn sour.

To propagate the choicer kinds of plants, however, a more careful mode of proceeding must be adopted.

Fill small pots with sand, place the cuttings close around the inside of them, sink the pots to the rim in the bed of sand, and cover them with bell-glasses. When the cuttings are struck the pots may be taken out and other pots with fresh cuttings fitted into their places. In this way, when the cuttings are removed, the bed of sand is not disturbed, as it would be were pots not employed. Moreover, it is maintained, cuttings strike far more readily by being laid in contact with the sides of the pots.

The sinking of the pots to the rim I consider of great importance; as one point essential to success in striking cuttings is that the soil in which they are inserted should, if anything, be of a somewhat higher temperature than the surrounding atmosphere. Whereas if the pots be left above ground, the evaporation that takes place through their porous sides must necessarily much reduce the temperature of the soil within them and so be very prejudicial to the cuttings.

Mr. Errington Head-Gardener of the Agri-Horticultural Society, informed me that of some thousands of cuttings, he put down one year in pure sand, most succeeded; but that on the following year nearly all that he so put down, failed. He therefore had adopted the material employed in the Botanical Gardens, which he said, uniformly proved efficacious; that is to say, three parts of sand to one of fine charcoal. This then, in all cases will be the material safest to use. Notwithstanding, I fancy in the instance where Mr. Errington failed with sand only, the sand was not pure; as, indeed, it hardly ever can be, when used just in the condition in which it is brought from the bed of the river. And the greater or less degree of impure matter incorporated in the sand may make all the difference in the cuttings, for which it is employed, not succeeding in one case, and succeeding in the other. I have myself on occasions well washed the sand; and it needs only to do so to find out how far from pure it is; but this is a very troublesome operation, which the admixture of a little charcoal renders needless as it is the nature of charcoal to correct all impurity.

1.] *The striking of cutting in water*, Dr. Lindley says, is an old practice and quotes a communication to the 'Gardeners' Chronicle,' to show the manner of it.—

"I tie vial-bottles by the necks and hang them in the windows of our small greenhouse, having filled them with clean soft water. I then put in slips of *Salvia Calceolaria Memulus*, Myrtle, or any thing I wish to propagate of the same description of plant; in about two or three weeks or a month, the little silverlike roots appear, and in a week or ten days I plant them in small pots well watered; they never seem to flag, or mind the change, and I rarely lose a slip."

I have myself practised this method during the Cold season with *Verbenas*, *Habrothamus*, *Salvia splendens* and *Roses*, and found no method more successful or less troublesome. The points to be attended to as most conducive to success I conclude to be the following:—

1. That the cuttings be the summits of the youngest shoots, in a state of vigorous growth at the time.
2. That capacious bottles be used, so that there be less likelihood of the water becoming foul.
3. That the water be changed often, to ensure its being quite pure.
4. That when changed it be tepid, so as to afford, in some degree, the bottom heat, so essential for the speedy formation of a callus.
5. That the cuttings be sheltered from wind and sun, but otherwise have all the light and air possible.
6. That they be removed out of the cold air into the house at night; and, if the bottles be plunged half-way up in a tepid bath, probably so much the better.

2.] I subjoin a few remarks by Miss Maling on the *striking of cutting in sand and water* — Helotropes, Verbenas, Lobelias, and Begonias do most beautifully, as do any of the very young soft shoots, when planted in pans of silver-sand soaked and overflowed with a little sheet of water. Many hard-wooded plants, even hard to strike by other means, will grow in this way well.

“The shoots taken off as short as possible, and as fresh, and having only the lowest leaves shipped off, if necessary, near the stalk (not close to it) may be stuck in all over, and if put in a warm and sheltered place, as over a greenhouse-stove, will grow most rapidly and make the most charming bunches of little fibry roots. These things will often strike even in small bottles of rain-water, the convenience of which is that they take up so little room. Previously to drawing out the little plants, it is well to soak the sand thoroughly, to avoid tearing the rootlets. The cuttings raised in sand must, as a rule, have their roots filled in with sand, when they are first removed.”

3.] The method of *propagating by eyes or buds* is simply to take a plump shoot of the season, on which the leaves are healthy and the buds not yet started. About half an inch or less above and below a bud, cut the shoot slopingwise into the wood, so that the cut each way may meet just about a quarter of an inch behind the bud. The piece of the shoot with the bud upon it just as it is, is planted firmly in a pan of sand, with the point of the bud just visible above the surface. It is essential that the bud have a leaf attached to it, which should not be taken off. The sand is kept moistened and the pan covered with a pane of glass. This is a practice that has long been employed in England in raising plants of the Orange tribe, and has proved equally successful with Camellias and Roses.

1.] *Propagation by layering*, though, generally speaking, a slower process than by cuttings, is a much surer one, for there are few plants which, when in a thriving condition, cannot be multiplied by this method. It is obvious, moreover, that larger and more advanced plants may be obtained by layers than by cuttings.

The operation is as follows: select a branch of ripened wood of the plant to be layered, that will bear being bent down to the earth without breaking. Cut the branch half through with a sharp knife just under one of the leaf-buds towards its extremity, and then pass the knife upwards, so as to slit the branch about an inch or two up. The slit-piece, with the leaf-bud at its extremity, called the “tongue” should be kept open by inserting a small piece of tile. Remove the earth to the depth of two or three inches from, or place a flowerpot over, the spot just where the tongue falls, on the branch being bent down, then carefully bend the tongued part of the branch into the earth, or into the flowerpot; secure it in that position by a peg and cover it over with earth, which should be pressed down and watered. It is recommended to head down the branch when layered; but this is not always done. If the layer is put down in the month of February or March it is very essential that the soil be frequently watered, and never allowed to become dry and hard. What Mr. Rivers enjoins with regard to the layering of Roses may, no doubt, be considered applicable to all layered plants. “Have the tongue at the upper part of the shoot, so as not to be in the part which forms the bow as it is of consequence that it should be within two inches of the surface, so as to feel the effects of the atmospheric heat. Unless this is attended to, the roots will not be emitted quickly.”

A modification of the above process, I have found attended with great success in layering some kinds of Roses and other plants, the boughs of which are too rigid to be bent down:—

Procure a flowerpot which has had part of its side broken out, make a tongue in the branch to be layered, as before directed. Raise the flowerpot up so that the branch, passing through the broken side may have its tongued part just about two inches below the level of the soil, when the pot is filled in. Keep the flowerpot permanently in this position by some support placed beneath it; insert a piece of tile in the pot where the side is broken away, and then fill in with a mellow soil composed of leaf-mould and sand, which must be kept constantly moist.

5.] *The mode of propagation by Gootee* is thus described by Mr. Masters, formerly head-gardener in the Calcutta Botanical Gardens:—

“Select a firm healthy branch, the wood of which is well-ripened; and immediately under a leaf-bud take off a small ring of bark, about one inch wide. Scrape the woody part well, so that no bark remains. Apply a ball of well-tempered clay; bind it on securely with tow or other soft bandage; make it fast to a stake, if necessary; hang a small pot, having a hole in the bottom, just over the Gootee; supply it with water daily. In a few months you will obtain a fine well-rooted plant.

“As the fibres are emitted from the buds that are above the wound, they will descend into the ball of earth and form roots. As soon as they are seen protruding

themselves through the bandage, the branch may be cut off from the parent-tree, and planted where it is intended that it should remain. This appears to be the most expeditious method of obtaining strong well-rooted plants, and, at the same time, is a sure method of procuring duplicates of any desirable variety. Of sixty-five Goothees, made in June, of the *Jonesia Asoca*, the whole were well-rooted in October; while of forty-layers made at the same time, and on the same individual tree, none were well rooted and some only just beginning to form. The Lichee requires four months to form good roots."

6.] *The operation of inarching* is commonly called grafting here, and is always substituted for it, being performed with far greater certainty of success; but, except for Mangoes, Sapotas, and in Bengal Peach trees, there is not often need to resort to it. Some of the choicer kinds of Roses, it is true, are frequently inarched; but with due care more thriving plants may be procured by means of cuttings, or layers, if not by budding. The process is performed thus:—Procure a seedling, of about one or two years old, of the plant to be inarched, or where a seedling is not to be obtained, a rooted cutting of the same age, of the plant that is to supply the stock. Put it in a pot, and when it is well established it will be ready to be operated upon. Slice away from one side of the young stem a piece of bark, with a thin layer of the wood beneath it, about two inches long; do the same to a young stem of the plant to be inarched from, and then bring together the two stems that have thus been operated upon so that the cut parts lie close in contact face to face, and bandage them with cotton twist. In course of time, when the parts have united, head down the stock and dis sever the scion from the parent plant by cutting it through below the bandage. The grafted plant must then be put somewhere in a shaded place and not removed from its pot till it has made a vigorous growth, and stock and scion have become thoroughly incorporated.

IMPERIAL ACTS,—GOVERNMENT OF INDIA.

STAMP ACT NO. XVIII. OF 1869.

This Act may be called "The general Stamp Act, 1869." It extends to the whole of British India; and is in force from the first day of January 1870.

On and after that day, the enactments specified in the third Schedule hereto annexed shall be repealed to the extent specified in the third column of the same schedule.

For every instrument mentioned in the schedule hereto annexed and executed in British India, on or after the first day of January 1870, or executed out of British India on or after that day, but relating to any property within British India, there shall be payable to the Government of India, as stamp duty, the amount indicated in the first or second schedule hereto annexed to be the proper duty for such instrument.

(a)—All instruments chargeable under this Act with the duty of one anna, bills of exchange and promissory notes drawn or made out of British India, and transfers by endorsement of shares of Companies and Associations may (subject to the provisions hereinafter contained) be stamped with adhesive stamps.

(b)—The stamp on every other instrument chargeable under this Act shall either be impressed on the paper whereon the instrument is written, or be otherwise denoted by the Collector or the Superintendent of Stamps, in accordance with such rules as the Governor-General of India in Council may from time to time prescribe in this behalf.

Duties by whom payable—In the absence of an agreement to the contrary, the expense of providing the proper stamp shall be borne—

1st.—In the case of any instrument mentioned in the first schedule to this Act (other than a policy of insurance, a mortgage-deed, a settlement, a conveyance, a lease, an instrument of exchange of partition-deed where money is paid for equality of exchange of partition, an appraisement of valuation, an award and a copy, duplicate or extract),—by the person drawing, making, or executing such instrument:

2nd.—In the case of a policy of insurance—by the insured:

3rd.—In the case of settlement—by the settler:

4th.—In the case of a conveyance, mortgage-deed, or lease—by the grantee, mortgager or lessee:

5th.—In the case of a counterpart of a lease—by the lessor:

6th.—In the case of a partition-deed—by the parties thereto in proportion to their respective shares in the property comprised therein: and

7th.—In the case of an exchange where money is paid for equality of exchange—by the person paying such money.

ADMINISTRATOR GENERAL'S OFFICE.

High Court, (South side 3rd Floor.)

THE ADMINISTRATION

OF THE PROPERTY IN INDIA OF DECEASED PERSONS.

THE CUSTODY AND PRESERVATION OF THE PROPERTY IN INDIA OF DECEASED PERSONS NOT HINDUS, MUHAMMADANS, OR BUDDHISTS.

When any person, not a Hindu, Muhammadan, or Buddhist, or exempted by the Governor-General in Council from the operation of the Indian Succession Act, dies leaving "assets" in India, it is the duty of the "Judge of the District" (Act II of 1874, §64) within which the assets are locally situated at the time of the death, to take charge of them, and this is always the case, whether the deceased has left a Will or died intestate,

The district Judge is to report the case to the Administrator-General of the Presidency (Act II of 1874, § 64.) "Assets" include immoveable as well as moveable property (*ib.* § 3)

In case of a death, therefore, persons interested in the preservation of the property of the deceased in India should at once communicate with the Judge of the district in which any of it is situated, and with the Administrator-General of the Presidency.

They should state the full name and occupation of the deceased—his nationality—the date and place of his death—the nature and amount of any property he may have left in the district in question, or in any other part of India, whether there is or is not a Will, if so, where it is; the names and addresses of the witnesses and executors: if there is no Will, they should give the names and addresses of the next-of-kin of the deceased, &c., so far as they are themselves informed on these matters.

It is also very important, with reference to the stamp duty, that the person who is to represent the estate should know, as soon as possible, the value of the assets, moveable and immoveable, as accurately as it can be ascertained; for until he has this knowledge he cannot apply for probate or letters of administration. The Court Fees Act imposes a stamp duty of 2 per cent. upon the assets if they exceed 1,000 rupees, and there is no provision in the Act for any adjustment of the stamp duty after the grant has been made. It must be paid in full at once, and no refund can be made under the Act if the assets are over-estimated. The Government will, however, under a recent order, allow application to be made for a refund in respect of money paid in satisfaction of the debts of the deceased. If the assets do not exceed 1,000 rupees, no stamp is required.

THE REALIZATION OF PROPERTY OF SMALL VALUE BY A CERTIFICATE
FROM THE ADMINISTRATOR-GENERAL, BY THE POLICE,
AND OF SMALL SUMS IN THE GOVERNMENT SAVINGS BANK.

If the whole of the assets do not exceed in value Rs. 1,000, any person entitled as executor, as widow, or to administer in any capacity save as a creditor, may apply at once, in writing, to the Administrator-General of the Presidency for a Certificate, and on satisfactory proof of the representative right, a certificate can be granted entitling the claimant to receive the sums or securities for money therein severally mentioned (Act II of 1874, § 36) or a creditor may obtain a certificate after the lapse of three months, or the Administrator-General may act without probate or letters of administration (§37)

But no certificate can be granted when probate or letters of administration have been obtained, or in respect of any sum of money deposited in a Government Savings Bank (§ 37.)

Where persons die intestate in the Presidency Towns, leaving property under 200 rupees in value, the police authorities are empowered to take charge of it and to deliver it over to any person showing a right to it, without letters of administration (Act XIII of 1856, § 113, and the Bengal Act IV. of 1866, § 1,000 Madras Act VIII. of 1867.)

When a person dies leaving in a Government Savings Bank a deposit of a sum of money not exceeding 1,000 rupees, and if probate of his Will, or letters of administration to his estate, or a certificate under Act XXVII of 1860 (this certificate is different from that granted by an Administrator-General, and is granted by a Judge, and is now only given in native cases) is not produced to the Secretary of the Bank within three months of the death of the depositor, the Secretary may pay the money to any person appearing to him to be entitled to receive it or to administer to the estate of the deceased, and he may take such security from such person as he thinks necessary, and he may also, in order to ascertain the right of the person claiming the money, take evidence on oath or affirmation.

An executor or administrator of a deceased depositor is entitled afterwards to receive any sum in the hands of the person so receiving the deposit from the Secretary of the Bank, deducting such part of it as is lawfully paid away in the due course of administration, and a creditor of the deceased may recover his debt against a person so receiving the deposit, should any part remain in his hands unadministered, in the same manner as if the receiver had obtained letters of administration.

If the amount of deposit in a Government Savings Bank belonging to the estate of a deceased person does not exceed 1,000 rupees, such amount shall be excluded in computing the fee chargeable under the Court Fees Act of 1870 on the probate or letters of administration or certificate in respect of his other property. But a certificate of the deposit amount signed by the Secretary of the Bank will, in this case, have to be produced before the Court (Act V. of 1803 *The Government Savings Bank Act.*)

The enactment does not apply to deposits in Savings Banks belonging to estates of European officers, soldiers or deserters.

LETTERS OF ADMINISTRATION IN CASE OF INTESTACY.

When the deceased has died intestate, those who are connected with him either by marriage or consanguinity, are entitled to obtain letters of administration of his estate and effects in the following order (Act X. of 1865 § 200.)

If the deceased has left a widow, administration shall be granted to the widow, unless the Court shall see cause to exclude her.

If there be no widow, or if the Court see cause to exclude her, it shall commit the administration to the person or persons who would be beneficially entitled to the estate according to the rules for the distribution of an intestate's estate: provided that when the mother of the deceased be one of the class of persons so entitled, she shall be solely entitled to administration (§ 203.)

Those who stand in equal degree of kindred to the deceased are equally entitled to administration (§ 204.)

The husband surviving his wife has the same right with respect to her estate (§ 205.)

When there is no person connected with the deceased by marriage or consanguinity who is entitled to letters of administration and willing to act, they may be granted to a creditor (§ 206), but an Administrator-General is entitled to administer in preference to any one but an executor, universal legatee or absolute next-of-kin (Act II of 1864, § 15.)

The application for letters of administration should be made by petition properly stamped, and should state the time and place of the death of the deceased, the family or other relatives of the deceased, and their respective residences; the right in which the petitioner claims; that the deceased left some property within the jurisdiction of the District Judge to whom the application is made; and the amount of the asset which are likely to come to the petitioner's hands (§ 246.) The petition should be subscribed by the petitioner and verified thus:—"I, (A. B.) the petitioner in the above petition, declare that what is stated therein is true to the best of my knowledge and belief (Act X. of 1865 § 247.)

Letters of administration cannot be granted until after the expiration of fourteen clear days from the day of the intestate's death (§ 258.) They entitle the administrator to all rights belonging to the intestate as effectually as if the administration had been granted at the moment after his death (§ 191), but they do not render valid any intermediate acts of the administrator tending to the diminution or damage of the intestate's estate (§ 192.)

Every person, except an Administrator-General, to whom any grant of administration is committed, is called upon to enter into a bond, with two sureties, engaging for the due collection and administration of the assets (§ 256.) This bond is generally in double the amount of the assets likely to come to his hand, and is stamped with a stamp now fixed at 8 rupees (Act VII. of 1870, schedule 2, clause 16.)

SUCCESSION TO MOVEABLE PROPERTY OF DECEASED PERSONS IS REGULATED BY THE

LAW OF THEIR PLACE OF DOMICILE.

Should any person die possessed of property in British India, succession to his immovable property is regulated by the law of British India, wherever he may have had his domicile at the time of his death (Act X. of 1865, § 5). It follows, therefore, that the law of British India must be complied with—first, in determining the validity of a Will, should there be one; second, in the construction of the Will; and third, in case of intestacy, in determining the persons among whom the property is to be divided.

But succession to the moveable property of a deceased person is regulated by the law of the country in which he had his domicile at the time of his death (*Ibid*). Hence it is necessary in such cases to determine in the first instance what was the domicile of the deceased person.

Under the Indian Succession Act § 6 a person can only have one domicile for the purpose of succession to his moveable property. The domicile of origin of every person of legitimate birth is in the country in which, at the time of his birth, his father was domiciled; or if he was a posthumous child, in the country in which his father was domiciled at the time of his father's death (§ 7); and the domicile of origin of an illegitimate child is in the country in which, at the time of his birth, his mother was domiciled (§ 8). The domicile of origin prevails until a new domicile has been acquired (§ 9.)

A man acquires a new domicile by taking up his fixed habitation in a country which is not that of his domicile of origin (§ 10.) The points to be determined are therefore—first, whether he actually has taken up his residence in the country; and second, whether he intends to make it his “fixed” residence for the future. (Explan. and Illustrat. *Ibid.*)

A person may acquire a domicile in British India either by taking up his fixed habitation in the country as above, or by making and depositing in some office in British India (to be fixed by the local Government) a declaration in writing under his hand, of his desire to acquire such domicile, provided that he shall have been resident in British India for one year immediately preceding the time of his making such declaration (§ 11). A new domicile continues till the former domicile is resumed, or another has been acquired (§ 13).

By marriage a woman acquires the domicile of her husband if she had not the same domicile before (§ 15); and the wife's domicile during the marriage follows the domicile of her husband, unless they be separated by the sentence of a competent court, or if the husband is undergoing a sentence of transportation (§ 16).

Succession to moveable property of a person who dies in British India leaving moveable property therein, in the absence of proof of any domicile elsewhere, is regulated by the law of British India (§ 19).

It would be competent to a foreigner dying in, and not domiciled in British India, by a Will properly executed to appoint the Administrator-General or any other person his executor; and such an appointment would be valid as against the Consul of his nation (§ 179), the executor would be bound to distribute the estate according to the law of the country of the domicile of the deceased as to his moveable property, whilst his immoveable property, if any, would be subject to the law in force in British India (§ 5).

But should a foreigner having acquired a domicile in British India die either intestate or leaving a Will, the succession to his estate would be regulated by the law in force in British India relating to intestate succession or to Wills as the case might be. That law would apply to all his property whether moveable or immoveable in British India; it would all pass to the executor or administrator as the case might be (§ 179); but it would not necessarily pass to the Administrator-General, unless he should administer. This he would do only in case he were appointed executor, or in the absence or at the request of the next-of-kin or executor, or of an universal legatee (Act II. of 1874, § 15.)

THE ADMINISTRATOR-GENERAL, HIS DUTIES AND POWERS.

There are three Administrators-General in British India, one for each of the Presidencies of Bengal, Madras and Bombay (Act II. of 1874, § 4.) Their offices are at Calcutta, Madras and Bombay, respectively.

The Presidency of Bengal includes, for this purpose (§ 3), the territories which are or shall for the time being be respectively under the governments of the Lieutenant-Governor of Bengal, the North-Western Provinces, and the Punjab, and under the Administration of the Chief Commissioners of Oudh, the Central Provinces, British Burmah, Ajmere and Mairwara, Assam and the Andaman and Nicobar islands, and such of the dominions of the Princes and states in India in alliance with Her Majesty as the Governor-General in Council may, by notification in the *Gazette of India*, from time to time, direct.

The Presidency of Madras includes the territories which are or shall for the time being be under the Government of the Governor of Fort St. George in Council, Coorg, Mysore, and such of the dominions aforesaid as the Governor-General in Council may, by notification in the *Gazette of India*, from time to time direct. (*ib.*)

The Presidency of Bombay means the territories which are or shall for the time being be under the Government of the Governor of Bombay in Council, the Hyderabad-Assigned Districts, and such of the dominions aforesaid as the Governor-General in Council may, by notification in the *Gazette of India*, from time to time, direct. (*ib.*)

The duties of the Administrators-General, and their powers, will be found set out at length in Act II. of 1874 of the Governor-General of India in Council. But it may here be shortly stated, that under Section 15 of that enactment, the Administrator-General is entitled to letters of administration, unless granted to an universal legatee or to the nearest-of-kin, that is, the nearest-of-kin absolutely, not merely the nearest-of-kin in India—in the goods of *Smallwood*, per Norman J., July 20th 1868, where a brother, the nearest-of-kin in India, was held not to be entitled in priority of the Administrator-General, there being a father and mother alive in England.

By Section 16 he is required, within a reasonable time after he shall have had notice of the death, and that the deceased has left assets within the Presidency (as defined

above) to take steps to apply to the High Court for letters of Administration, and this, whether the deceased has left a Will or not, provided that the assets are of greater value than Rs. 1,000 and that no person shall, within a month after the death, have applied in such Presidency for probate of a Will, or for any letters of Administration of the estate; that is to say no person to whom the Court would have given letters of Administration which would be effectual as regard the assets for which administration is sought.

But there is nothing to prevent the Administrator-General from applying to the Court for letters of administration in any case within the period of one month from the death of the deceased (Act II. of 1874, § 23)

If the assets do not exceed Rs. 1,000 in value in the whole, the Administrator-General is not bound to act; but he may either grant a certificate to some persons entitled, or take charge of the estate himself without letters of administration, under (Act II. of 1874, § § 36, 37.)

Letters of administration or probate granted to an Administrator-General in his official capacity, authorize the person filling the office for the time being to act as administrator or executor of the estate to which such letters of administration or probate shall relate (§ § 29, 30) and all estates, &c., vested in the Administrator-General, all his books, &c., become vested in and transferred to his successor in office (§ 33), thus the inconvenience, delay and expense attending the appointment of a fresh administration on the death of the original administrator or executor are avoided when the estate is placed in the hands of the Administrator-General.

Any private executor or administrator may, with the consent of the Administrator-General of the Presidency in which the property comprised in the probate or letters of administration is situate, by an instrument in writing under his hand bearing a stamp of ten rupees, and notified in the local Gazette, transfer the estates, &c., vested in him by virtue of such probate or letters to the Administrator-General by his name of office; and thereupon the transferor becomes exempt from all future liability. His future rights and responsibilities are transferred to the Administrator-General. But the transferor remains liable for all his acts and omissions in respect of the property prior to the transfer (§ 31.)

As soon as the Administrator-General takes charge of the estate, the fact is advertised in the Gazette and in the public papers, and creditors are called upon to prove their claims. They should state the amounts and other particulars, and support their claims by such evidence as (under the circumstances of the case) the Administrator-General is reasonably entitled to require. If a claimant fail to do this within one month of the date of the institution of any suit he may bring against the Administrator-General in respect of his claim, he will be liable, in any event, to pay the costs of the suit, and he will not be entitled to have his decree enforced. If he obtain judgment, he will be entitled only to payment out of the assets rateably with the other creditors (§ 35.)

The Administrator-General, like every other executor or administrator, is bound to keep the assets for a reasonable time, to answer the claims of creditors. This time is fixed by the law generally at one year (Wms. Exors, 6th ed, p. 1286), but where the case permits of it, the account can be closed earlier. Like any other executor or administrator he is bound to pay all creditors rateably or preferentially, according to the law governing the distribution; after the expiration of a year from the date of his administration no claim can be made upon him in respect of any assets paid or delivered by him to any legatee, or to any person entitled in distribution unless he had notice of the claim (§28.)

Under the Indian Succession Act the following payments only may be made in preference, *viz*:—Funeral expenses, death-bed charges, fees for medical attendance, board and lodging for one month prior to death.

Expenses of obtaining probate or letters of administration, including the costs of any judicial proceedings necessary for administering the estate, rank next, and then wages for services rendered to the deceased within three months next preceding his death, by any laborer, artizan, or domestic servant; all other debts are on an equal footing (Act X. of 1865, §§ 279, 280, 281, and 282.) These rules apply in all cases where the assets consist of immoveable property in British India; where they consist of moveable property, the law of the country in which the deceased was domiciled prevails (§ 283); but no creditor who obtains a part payment in preference to others by reason of this rule, can share in the proceeds of any immoveable property of the deceased without bringing such payment into account (§ 286.)

The Administrator-General is bound to keep accounts as prescribed by the Act. These accounts are audited by the Government and his books are open at all times to the Auditor appointed by Government and to allow persons entitled so to do to inspect them on payment of a reasonable fee fixed by Government (Act II. of 1874, § 4.); he is bound to furnish half-yearly Schedules of the estates under his charge in form prescribed by the Act; these schedules are published in the Gazette of the Presidency. Three copies are sent to the Government for transmission to the Secretary of State for India for the information of persons who are interested in the matter.

The Administrator-General of Bengal is entitled to a commission of 3 per cent. and the Administrator-General of Bombay or Madras to a commission of 5 per cent. (§ 52), except in the case of the estates of officers and soldiers, when the commission is uniformly 3 per cent., on the assets after payment of the preferential charges (§§ 21 and 52.) This commission is to cover the expenses of his establishment; but he is entitled to reimburse himself, in addition for any payment made by him in respect of any estate in his charge, which a private administrator of such estate might have lawfully made (§ 54.) The commission allowed by the Act is the maximum commission. It may be reduced by arrangement in special cases. No person other than an Administrator-General acting officially shall receive or retain any commission or agency charges for anything done under any probate or letters of administration (§ 56.)

All correspondence to the Administrator-General, should be addressed to him by his name of Office.

NATIVE WILLS.

An important change in the law regarding the Wills of Natives was effected by Act XXI. of 1870, by which Act certain sections of the Indian Succession Act are applied to all wills of Hindus, Jains, Sikhs or Buddhists made after the 1st of September, 1870, within the territories subject to the Lieutenant-Governor of Bengal or the local limits of the High Courts of Judicature at Madras and Bombay; and to all such wills and codicils made outside those territories and limits, so far as relates to immovable property situate within those territories or limits.

The sections that have been so applied are enumerated. They relate to:—

1. The execution and revocation of Wills and Codicils.

This subject which was very obscure is now no longer left in uncertainty.

The rules are prescribed by the Act—

2. The construction of Wills.

The simple rules contained in Sections 82, 83, 85, and in Sections 88 to 103, (both inclusive) of the Indian Succession Act, are applied to these Wills of Natives, as are also the rules as to the Vesting of Legacies—Onerous and Contingent Bequests, Conditional Bequests and Bequests with directions as to their Application or enjoyment—Bequests to an executor—Specific and Demonstrative Legacies—The Ademption of Legacies—The payment of Liabilities in respect of the subject of a Bequest—Bequests of things described in general terms—of the Interest of Produce of Land—of Annuities—Legacies to Creditors and Portioners—and Election.

3. The proceedings and practice to be observed in obtaining Probate of Wills.

4. The rights and duties of Executors.

In all these matters the native Will is put on the same footing with the Will of the European—any executor may be appointed—and if it is desired to obtain the security of the Government Audit of the executor's accounts, the estate may be made over to the Administrator-General either by the original will or by transfer (under Act II. of 1874, § 31,) as is done in the case of Europeans.

OFFICIAL TRUSTEE'S OFFICE.

Town Hall.—(Ground Floor.)

This office was created by Act XVII. of 1843, in consequence of the difficulty experienced in India in obtaining private Trustees, and the trouble and expense of appointing new Trustees, on the death or departure from India of those already created. The office is now regulated by Act XVII. of 1864.

The Official Trustee is paid by commission, and may, at his own option, undertake all kinds of Trusts, except Religious Trusts; but must always be appointed sole Trustee, and cannot act jointly with any one else.

There are five classes of cases under the Act in which the services of the Official Trustee will be useful.

(1.) *New Trusts*.—When a person is desirous of making a settlement of property on marriage, or at any other time, for the benefit of his wife or family or of any other person, or for a charitable purpose.

(2.) *Assignment for benefit of creditors*.—When a person in embarrassed circumstances is desirous of assigning all his property to a Trustee for the benefit of his creditors.

(3.) *Existing Trusts*.—When the Trustees are dead, or out of the jurisdiction of the High Court, or unwilling to continue acting.

(4.) *Gifts or Legacies for Infants or Lunatics*. When the executor or other person holding such property is anxious to be relieved of the charge.

(5.) *Trusts under a Will*.—In all cases the consent of the Official Trustee to his appointment must be obtained before-hand, or the appointment will not be valid.

MODE OF OBTAINING APPOINTMENT OF OFFICIAL TRUSTEE.

In new Trusts he is appointed by the Deed creating the Trust. In other cases a petition to the High Court is necessary, the costs of which are usually ordered to be paid out of the Trust Funds. By means of a deed of new appointment in the one case and by a like petition in the other case, the Funds can always be retransferred to a private Trustee, unless otherwise provided by the Deed or Will creating the Trust.

All property and interests vested in an Official Trustee will, upon his death, resignation, or removal from office, vest in his successor in office, without any fresh appointment or charge whatsoever.

It is necessary to employ a Solicitor in preparing Trust Deeds, and in applying to the Court for the appointment of Official Trustee. In most cases, also, it will expedite business if communications respecting Trust be made through a Solicitor.

COMMISSION.

In new Trusts the rates are agreed upon between the person creating the Trust and the Official Trustee, and will vary according to the nature of the duties to be performed.

In existing Trusts, and on property received for infants and lunatics the rates are fixed by the Act as follows:—

$\frac{1}{2}$	per cent. on capital monies received.
$\frac{3}{4}$	per cent. on interest and dividends realized.
$2\frac{1}{2}$	per cent. on rents collected.

Also $\frac{1}{2}$ per cent. on the investment, when necessary, of any funds received in cash.

INVESTMENTS.

Capital monies and surplus income are invested in Government Securities, except it be otherwise provided by the Deed or Will creating the Trusts.

CUSTODY OF SECURITIES.

All Securities are kept in the Bank of Bengal, and cannot be removed from thence except under an order signed by a Judge of the High Court, specifying the purpose of such removal.

REMITTANCES TO EUROPE.

Remittances to beneficiaries resident in Europe are made at the Government rate of exchange for the year through Government to the Official Agent at the India Office London, for payment to parties entitled.

AUDIT.

The accounts are audited yearly by Auditors appointed by the Chief Justice.

N. B.—Persons wishing to make a disposition of property by *Will*, and to appoint an Official Executor, should appoint the *Administrator General*, and not the Official

Trustee, who cannot act in the capacity of Executor. The Official Trustee however may be appointed Trustee of a Will; his duties as such to commence after the administration of the estate under the Will has been completed, for the consent of the Official Trustee must be obtained to such appointment and be evidenced by his signature at the foot of the Will. The duties of the two Offices are distinct, though they may be and sometimes are held by the same individual.

All correspondence to be addressed to the official Trustee of Bengal, High Court, Calcutta.

POST OFFICE.

Rates of Postage and conditions of transmission by the Inland* Post.

EXCLUSIVE PRIVILEGE OF THE INDIAN POST OFFICE.

The Indian Post Office is governed by the provisions of Act No. XIV of 1866, entitled "The Indian Post Office Act, 1866." By the above-mentioned Act the exclusive privilege of carrying letters is vested in the Government of India (Section 5 and 6), and penalties are prescribed (Section 46) for any infringement of this privilege.

*By "Inland Post" is meant the post maintained by the Government of India between Indian Post Offices, whether by land or by sea. This does not include the post maintained by the Government of India between British Burmah and the Straits (British India Steam Navigation Company), or between Calcutta and the Straits and China (Opium Steamers,) or between India and Ceylon (British India Steam Navigation Company and land Post), the Post Offices in the last mentioned places not being Indian Post Offices; nor does it include the post maintained by Her Majesty's Government or by the French Government between the Indian Post Offices of Calcutta Madras, Pondicherry, Bombay, and Aden; but it includes the post maintained by means of the Indian Contract Mail Steamers of the British India Steam Navigation Company between the Continent of India and British Burmah, as well as between the different ports on the east and west coasts, and between Bombay, Kurrachee, and the Indian Post Offices in the Persian Gulf, &c.

The sender of a registered letter can have an acknowledgment signed by the addressee sent to him if he prepays at the time of posting an extra postage fee of one anna.

A like facility for obtaining acknowledgments for parcels has now been introduced, but it only applies to parcels for which receipts are given under paragraph 10 page 6 of the Postal Guide of 1st April 1878.

Note.—(1.) Postage can be prepaid only by means of a proper stamp or stamps, adhesive or embossed

(2.) Any article sent by Letter Post can be registered under the regulations applicable to the registration of letters.

(3.) The tola is the standard weight of a Government Rupee. It is equal to $1\frac{7}{8}$ ounce (avoirdupois), 10 tolas being thus very slightly in excess of 4 ounces.

LETTERS.

What articles treated as letters, when they do not exceed 10 tolas in weight.

2. Any article not exceeding ten tolas in weight which does not come under the conditions prescribed for registered newspapers, proof sheets, parcels or packets, is treated as a letter.

What articles treated as letters, when they exceed 10 tolas in weight.

3. Any article exceeding ten tolas in weight, and not coming under the conditions prescribed for registered newspapers or proof sheets, which is superscribed for transmission by letter post, or is prepaid at the letter post rate, or is judged from its outward appearance or other considerations to be intended for transmission by letter post, is also treated as a letter.

Unpaid or insufficiently paid letters.

4. The postage chargeable on a letter, if not prepaid, is double the amount which would have been chargeable if prepaid, and if the prepayment is insufficient, double the deficiency is charged.

* By "open covers" are meant covers open at the ends so as to admit of a ready examination of the contents.

12 pies or 1 anna = (about) 1½ penny or 12 centimes.

16 annas or 1 Rupee = (about) 1s. 7½ d or 1 franc 92 centimes.

REGISTERED NEWSPAPERS.

What articles treated as registered newspapers.

5. Periodical publications, published at intervals not exceeding 31 days, which have been registered for transmission by post in the Office of the Post Master General (or officer exercising the powers of Post Master General) of the postal circle in which they are published, and which fulfil the under-mentioned conditions, are treated as registered newspapers.

N. B.—The registration of a paper expires at the close of the calendar year following that in which the registration was effected, and must be renewed if a continuance of the privilege beyond that time is desired.

Each registered newspaper charged separately.

6. The postage rates given above are chargeable upon *each* registered newspaper; but an extra or supplement to any registered newspaper bearing the same date as the newspaper, and transmitted therewith under the same cover, is deemed part of the newspaper.

Prepayment of registered newspapers compulsory.

7. Registered newspapers can be forwarded by the letter post at the above-mentioned rates only if the postage be fully prepaid. A registered newspaper posted unpaid or insufficiently paid, but in other respects fulfilling the under-mentioned conditions, will be forwarded to the Dead Letter Office.

Conditions to be observed in respect of registered newspapers.

8. Registered newspapers can be forwarded by letter post at the above-mentioned rates only if the following conditions be observed, *viz* —

- (1.) It shall be without a cover, or in a short cover open at the ends.
- (2.) There shall be no word printed on such newspaper after its publication, or upon the cover thereof, nor any writing or mark upon it, or upon the cover of it, except the name and address of the person to whom it is sent, and the name and address of the sender.
- (3.) There shall be no paper or thing enclosed in or with any such newspaper.
- (4.) The newspaper must bear in print in a prominent position above the address or on the outside fold the word "registered," followed by the registration number given by the Post Master General.

(5.) Each Registered Newspaper should be posted singly; but where several Newspapers are transmitted to one address they may, if folded separately, with the registration number outside, be put in one bundle, subject to a postage charge equal to the aggregate of the postage due on each Newspaper. In this case, the number of separately folded Newspapers in the bundle must be specified in a prominent way above the address: thus "——— separate Newspapers." If this is not done, the bundle will be treated as a packet or parcel under paragraph 10.

N. B.—The word "registered," followed by the number, may be printed (either in English or in a vernacular character) on the paper itself or on its cover, but must in all cases be in a prominent position above the address.

PROOF SHEETS

May be sent by letter post at registered newspaper rates under certificate.

9. Proof sheets, marked as such, may be sent by the letter post either without covers or in covers open at the ends at the rates prescribed for registered newspapers provided that the contents be correctly certified on the cover by the signature in full of the sender.

PARCELS AND PACKETS.

What articles treated as parcels or packets when they do not exceed 10 tolas in weight.

10. Any article *not exceeding ten tolas in weight* which is specially marked for transmission as a parcel and fulfils the conditions laid down for parcels is treated as a parcel; and any article *not exceeding ten tolas in weight* and not falling to be treated as a parcel which has the ends open (see definition in paragraph 1) and is prepaid with one *anna* postage, and does not contain any letter or communication of the nature of a letter (unless such letter or communication be wholly printed or lithographed.) is treated as a packet.

What articles treated as parcels or packets when they exceed 10 tolas in weight.

All articles committed to the Post Office, which exceed ten tolas in weight, and which do not fall to be treated as letters, registered newspapers or proof sheets, under the preceding paragraphs, are treated as parcels or packets; those which are posted fully prepaid at parcel rates or superscribed by the senders for transmission as parcels or presented at the Post Office for that purpose, or which owing to deficient prepayment or excess of size or mode of packing cannot be forwarded as packets are treated as parcels; and the others are treated as packets.

Parcels and packets how transmitted.

11. All parcels are transmitted by banghy post under a system of registration; packets not exceeding 10 tolas in weight are transmitted by letter post, and packets exceeding that limit are transmitted by banghy post: there is no registration for packets.

Mode of packing, prepayment, and contents of parcels and packets.

12. Parcels may at the option of the sender be packed in closed covers, but packets must be packed in open covers (see definition in paragraph 1), the prepayment of postage on parcels being optional, while for packets full prepayment is compulsory. Not more than one letter or communication of the nature of a letter (not wholly printed or lithographed), may be enclosed in any parcel, and no letter or communication of the nature of a letter (not wholly printed or lithographed), may be enclosed in a packet, nor may a packet contain anything closed against inspection: but with these exceptions, and with the exception also of dangerous substances and other articles which cannot be sent by post in any form, there are no restrictions as to the contents of parcels and packets.

Unpaid and insufficiently paid parcels.

13. Unpaid parcels are charged on delivery at the same rates as would have been chargeable if the postage had been prepaid, insufficiently paid parcels are charged on delivery with the deficiency.

Receipts given for parcels when properly packed.

14. A person tendering a parcel at a Post Office within the prescribed hours is entitled to get a receipt for it, provided that the parcel so tendered is securely packed in cloth, wax-cloth, or tin; and if it is packed in cloth, or wax-cloth, provided further that it bears seals with distinct impressions of some device (not that of a current coin) at intervals not exceeding five inches along the lines of sewing.

Receipts to be signed by addressee on delivery of parcels.

15. The addressees of parcels are required to sign receipts for them on delivery.

Limit of weight of parcels.

16. No parcel exceeding 25 seers (2,000 tolas) in weight can be received at any Post Office for despatch.

Parcels received by post from seaward, exceeding the above weight, are made over to the Collector of Customs for publication in his list of unclaimed packages.

Size of packets and parcels.

17. No packet may exceed one foot and a half in length, or one foot in width or depth; and if any such packet be posted, it will be treated as a parcel and charged accordingly.

Although no particular limit of size is prescribed in the case of parcels, a Post Office may refuse to receive any parcel which, owing to its size, shape or otherwise, cannot be carried without serious inconvenience to the mail service or risk to the parcel itself.

Parcels between places connected by guaranteed railway.

18. Between places connected by guaranteed railway, where the railway authorities may have intimated their readiness to undertake the conveyance and delivery of parcels, the Post Office does not convey parcels, except such as may be sent on the public service. Of course, if either the place of address or the place of despatch be not on the line of guaranteed railway, the above rule does not apply.

If it is desired to insure a registered letter or parcel—

Close the letter or parcel securely. If it is a letter, seal it in the centre and at the four corners of the envelope (which should be a substantial one) with distinct impressions of some device other than that of a current coin. If it is a parcel, pack it in cloth, wax-cloth, or tin; and if packed in cloth or wax-cloth, put similar seals at intervals not exceeding 3 inches along the lines of sewing.

Prepay the postage (as for a registered letter or for a parcel) by affixing postage labels. Certify the declared value in words and figures immediately above the address, as in the sample given on the margin.

Specimen or certificate.

Certified value, one hundred (100) rupees.

Major G. H. GRANTLEY,

15TH HUSSARS,

When the value certified does not exceed Rs. 50 ... 2 annas

When the value certified does not exceed Rs. 100 ... 4 annas

and 4 annas for every additional Rs. 100 or fraction thereof.

Signature
and date.

The post office receipt will acknowledge the insurance.

The post office is prohibited by rule from receiving coin, bullion, precious stones or jewels, for transmission by post in either letters or parcels *unless they are insured*.

If it is desired that the value of the contents of a parcel should be recovered from the addressee and paid to the sender—

Close the parcel carefully and seal it as described above for insured parcels. Present it at the post office window within registration hours with a memorandum containing—

The name and address of the sender in full.

The name and address of the addressee in full.

Value of the contents recoverable from the addressee.

Date of posting

Prepayment of the parcel is optional.

The post office receipt will show the value recoverable from the addressee, and give all needful information with regard to the payment to the sender

If it is desired to obtain an acknowledgment from the addressee of a registered article or parcel—

Fix additional stamps of the value of one anna on the registered article or the parcel and present it at the post office window within registration hours, furnishing in writing or verbally the name and full address of the sender. The post office receipt will indicate that an acknowledgment is due.

If a certificate of posting is desired—

Write a copy of the address as given on the article on a slip of paper or in a book and affix a half-anna postage label to it. Present the article and the written copy of the address at the post office window at least half an hour before the hour fixed for closing the mail for which it is intended. The post office will stamp the written copy as a certificate of the posting of the article. This certificate will not obtain for the article any special security in transit; it is merely a certificate of posting, the article being treated like any other article put in the letter box. This rule does not apply to registered articles and parcels for which receipts are given.

(12).—The charge of 2nd commission for each of the above transactions separately, or for two or more made in the same application, will be equal to the 1st commission charged on the original order.

Payment of Orders.

(13) —Money Orders are not transferable (by endorsement of holder) nor payable after the end of the twelfth month.

(14).—Whoever presents the order for payment, whether the rightful owner or otherwise, must give full information as to the name, surname and address of the person who originally obtained it, unless it be remitted by a Firm, when the name of the Firm, together with its address and occupation, should be given.

(15).—A Money Order presented at the Office drawn on must always be signed by the payee in the place allotted for his signature before receiving payment of the same.

(16).—In the case of a person unable to write, he must make a mark in presence of the passing Officer (Treasury Officer) who will certify it by adding his initials.

(17).—When an order is presented through a Bank of the town upon which it is drawn, it should be duly signed by the payee and crossed with the Banker's name.

(18).—If payment of an order is refused in consequence of the particulars given not according with the advice, the person presenting the order should communicate with the remitter with a view to obtaining correction of the advice from the issuing Office, on receipt of which the order will be paid if the error was made by the office of issue, but if otherwise, the order should be returned to remitter, who should obtain a fresh order.

(19) —After a Money Order is once paid, by whomsoever presented, no further claim will be admitted. The public are therefore cautioned—

1st.—To take all means to prevent the loss of the Money Order.

2nd.—Never to send the Money Order in the same letter with the information required on payment thereof.

3rd.—To be careful, on taking out a Money Order, to state correctly the name of the person in whose favor it is to be drawn.

4th.—To see that the name, address and occupation of the person taking out the Money Order are correctly known to the person in whose favor it is drawn.

(20).—Neglect of these instructions will risk the loss of the money, and will also lead to delay and trouble in obtaining payment.

Non-Renewal of Orders.

(21.) Money Orders will not for the future be renewable.

Refund of Orders.

(22) —An order may be refunded at the office of issue after it has been ascertained by the Treasury Officer from the Head Office that no duplicate has been issued, and it should be duly signed by the remitter in the place assigned for the payee's signature.

(23).—Refund of a duplicate order can be made after a non-payment certificate has been obtained by the Treasury Officer from the paying Office certifying that the original order has not been paid, and that payment has been stopped.

(24).—When alteration of the name of the payee or station drawn upon is desired, the original order must be surrendered and a fresh order will be granted in lieu of it, after ascertaining from the Head Office that no duplicate has been issued.

Duplicate Orders.

(25).—Duplicate orders are granted at the Head Office *only*, on the remitter, or payee, as the case may be, reporting the loss of the original order, and making application in the prescribed printed form.

(26).—An application from a third person will not be attended to, unless the authority of either of the two principals is produced.

(27).—Applications can be forwarded through the Treasury Officer.

Lapsed Orders.

(28.)—An order remaining unpaid after one year from date of issue, *i. e.*, issued in January, but unpaid at the end of the following January, is considered as void and lapsed to Government, and will not be paid, unless satisfactory explanation as to the cause of delay in presenting it for payment be furnished to the Comptroller General, who alone can authorize such payments.

Miscellaneous.

(29.)—If the Money Order form be clipped or mutilated, there may be difficulty as to paying it.

(30.)—To save time and prevent errors, the public are advised to furnish in writing to the issuing Office, at the time of application, the full particulars of every Money Order required, and to ascertain, before quitting the Issuing Office, that the order corresponds with those particulars.

(31.)—These regulations have been laid down to secure, as far as practicable, that payment be made to the rightful person, and all officers have been instructed to enforce them, so far as a due regard to public convenience will permit.

ECCLESIASTICAL FEES.

The following amended Rules for the levy of Ecclesiastical fees throughout India which have been framed by His Excellency the Governor-General in Council, are published for general information, in supersession of the Rules which appeared under Notification No. 548, dated the 18th September, 1868:—

I.—No fees are charged for the performance of the rite of baptism or burial, or for the registration of the performance of these offices.

II.—In addition to the fee for the Surrogate's license, a fee of Rs. 10 shall be charged on all marriages by license, except the marriages of officers and others in the Military or Naval Service of Her Majesty.

III.—The fee for the Surrogate's license shall be Rs. 50 both in the Presidency Towns and in the interior. No fee will be charged on marriage by banns.

IV.—When registers are searched and copy of any entry given, a fee of one rupee shall be charged for the first year,* and four annas for every additional year over which the search may extend, as well as a fee of one rupee for the certificate. Soldiers, sailors, and non-commissioned and petty officers are exempted from payment.

V.—A fee of eight annas for every square foot of ground occupied shall be charged for the construction of any masonry grave in a burial ground.

VI.—A further fee of one rupee per square foot shall be levied on the erection of a monument in a burial ground: provided, however that for a simple headstone or flat slab of the size of an ordinary headstone an uniform fee of Rs. 15 only shall be charged. A fee of Rs. 75 shall be levied on a faculty for the erection of a monument in a Church.

VII.—The fees levied on the construction of masonry graves and the erection of monuments shall form a fund for keeping the burial ground and Church compound in order, except in Calcutta and Bombay, where they will be credited to Government.

VIII.—British soldiers and non-commissioned officers are exempted, with retrospective effect, from the payment of any fee for the construction of masonry graves, or for the erection of monuments in burial grounds to the memory of their comrades, wives, or children. No monument, however, either regimental or private, shall exceed six square feet and no masonry grave shall occupy more ground than an area of eight feet by four. The simple stone slab or headstone should be generally adopted.

IX.—The Chaplain may at his discretion reduce or altogether remit, in cases of extreme poverty, the fee for searching registers and making copies as well as the fee leviable on the construction of masonry graves but not for the erection of monuments.

X.—The fees prescribed in these Rules should be paid to the Chaplain, or, in the absence of the Chaplain, to the officer in charge of the burial ground, and shall be duly accounted for.

MISSIONARIES.

Very Rev. Father Phillip of St. Joseph, D C, M A., Vicar General and Delegate for all the Convents in the Vicariate.

Rev. Father Cherubin of St. Lewis, D C, M A., Vicar, church of Cochin.

Rev. Father Joseph Elias of the Sacred Heart of Jesus, D C, M A., Vicar, church of Chattiath and Director of the Parochial missions, Cochin.

Rev. Father Camillus of the Presentation, D C, M A., Rector of the Seminary at Puthempally.

Rev. Father Candidus of the Immaculate Heart of Mary, D C, M A., Superior of the convent at Magnamey.

There are in this Vicariate two English schools attended by about three hundred children, and three hundred and eighty eight Vernacular schools attached to the Parish churches in which many thousands of children receive education proportionate to their wants.

At present there are six convents having thirty seven priests, thirty-three novices, and twenty-four lay Brothers. Their principal establishment is at Coonemaw near Verapoly where also the Society's noviciate is situated.

Besides the convents for Native monks, there are two convents for nuns of the same order; the one at Cochin where six East Indian nuns teach eighty-six girls, and attached to it is a Malayalim school attended by forty native girls; and the other near Coonemaw, where ten Malabar nuns, four novices and four lay sisters keep a boarding school and bring up girls of their nationality.

To the convent of Coonemaw is attached a Printing and Book-Binding establishment. Besides these, there are also four other Printing establishments in various parts of the Vicariate where many classical and pious books and a Malayalim Bi-monthly Gazette are published.

Secretary.—Rev. E K Blumhardt, *Christ Church Parsonage, Cornwallis Square.*

Treasurer.—W H Ryland, 14, Kyd street.

The object of the Association is to aid the Missionaries of the *Church Missionary Society* in their work in Calcutta and the surrounding districts, by collecting funds for the employment of Native Agents for preaching the Gospel in the streets, in chapels, in boys' and girls' schools, and visiting the natives from house to house. They also minister to the sick in the hospitals, and the afflicted inmates of the Leper Asylum and Alms house. One day in each week some of them go to visit the villages and towns around Calcutta. Besides these there are three Readers whose duty it is to read and explain the Scriptures to the domestics of European families.

The Association depends for its support upon the voluntary contributions of the Christian Public. Such contributions will be thankfully received by the Collectors, and also by any of the Members of the Committee.

MISSION OF THE LONDON MISSIONARY SOCIETY IN BENGAL.

Its object is to preach the Gospel to the Natives, and to promote the Christian education of Native youth of both sexes, to found and build up Native Christian Churches, and to educate Native Christian children. The principle of the London Missionary Society is to preach and teach the Gospel without reference to Sectarian peculiarities leaving it to Converts to choose their own form of church Government. The Society's North Indian Missions are at Calcutta and the 21-Pergunnahs, Berhampore, Benares, Mirzapore, Singrowlee, Almora, and Raneekhet. It has fifteen European Missionaries in Bengal and the Upper-Provinces, five ordained Native Missionaries, eleven Native Churches, six English Churches, five Central Institutions with affiliated Schools for boys, and seventeen Schools for Native Girls.

The Missionaries of the London Society have usually been employed in preaching in the Vernacular to the Natives, and in educating the young ; they have also been engaged in translating the Scriptures, and in Christian literary labors.

The local pecuniary affairs of the Mission in Calcutta are managed by the Bengal Auxiliary to the London Missionary Society.

Committee.—H Andrews ; Baboo B M Bose ; T J Brown ; Rev. T P Chatterjea ; C Grant ; Rev. W Johnson, B A ; Lieut. D Johnston ; H Mendes ; H T Ottewill ; E J Ridges ; Rev. R Robinson ; Rev. W J Wilkins ; and E A Dukes.

THE WOMEN'S WORKSHOP.

No. 10, Weston's Lane.

Patroness.—Her Excellency Lady Lytton.
Committee.—Mrs. Wagstaff, 1, Hungerford street ; Mrs. A Watkins, Elysium Row ; Mrs. J B Knight, 4½, Esplanade ; Miss Barry, Old Church Parsonage ; Mrs. E Symonds, 65, Bentinck street ; Mrs. Jas. Sutherland, 10, Clive Row.
Honorary Treasurer.—E Lindstedt.
Honorary Secretary.—Mrs. E Lindstedt, 9, Clive Row.
 "The Women's Workshop" was established in 1869 for the purpose of affording employment to a class of women, chiefly of Portuguese origin, whose extreme poverty and low condition claim the sympathy and assistance of those who are in better circumstances.

The object of the Society is not so much charity, as to encourage habits of industry, and to enable those who are able and willing to work to earn an amount which will form an important addition to their small incomes.

At the same time, the rates charged for work are not higher than those usually paid to Native Durzees.

The Workshop is self-supporting; Subscriptions are collected for the purpose of giving the women a tiffin of Tea and Biscuits.

The daily attendance of women averages from 70 to 110. The hours of work are from $\frac{1}{2}$ past 9 to 3.

It is hoped this statement of the objects and constitution of the Workshop, and the rates now quoted for work, will induce householders to aid the scheme. Orders for plain work will be especially welcome, as but a large number of the women are incapable of doing work of a higher class.

All orders will be received and promptly attended to by the Superintendent at the Women's Workshop, 10, Weston's Lane, and the Ladies of the Committee will be at all times ready to afford information to those who are interested in the Workshop and its objects.

RULES FOR GRANTS-IN-AID TO COLLEGES AND SCHOOLS.

1. A grant from provincial revenues is assigned by Government annually for each district, to be expended in grants-in-aid to Schools not under Government management provided they fulfil the conditions prescribed in the following rules.

2. Subject to approval and confirmation the district grant is distributed by the district Committee of Public Instruction to schools which are certified to be eligible under these rules, reference being had to the requirements of each locality as compared with others, and to the funds disposable.

3. The District Committee will draw up at some meeting not later than the 15th January in each year a grant-in-aid budget for the next ensuing financial year showing.

(a) The current unexpired grants which will run on throughout the year in gross, the number of and total grants to schools of each class only being shown. If any such grants have been reduced on account of failure to comply with the conditions the fact should be noted.

(b) The grants to expire during the ensuing year with detailed statement of renewed grants it is proposed to give and of reasons for which the Committee propose a renewed grant at the particular rate they may fix.

(c) New grants which are to be made from the beginning of the ensuing year or on the expiry of old grants with full details.

All renewals of grants which will expire during a year must be decided by the Committee before the beginning of each year and included in the grant-in-aid budget. All grants, whether new or renewed, must, for the future, terminate at the end of the financial year.

Every new grant proposed during the year must be reported specially with full information as above ; such grants can be reported singly or together if more than one grant is given at a time.

A statement of all proposed grants must be submitted to the Circle Inspector who may refer back to the Committee any case in which the grant is in his opinion given without due regard to the principles laid down by Government and may call for any information he may deem necessary. If the Inspector sees no objection, or if objecting the Committee on reconsideration adhere to their view, he will refer the grants with his own opinion for the orders of the Commissioner who may disallow any grants or may pass them. The grant statements passed by the Commissioner will be submitted to the Director for the final sanction of Government. It will be open to the Commissioner to permit the Inspector to dispose of ordinary grant-in-aid business and to refer for the orders of the Commissioner only those cases where there may be a difference of opinion between the Committee and the Inspector. The Director will publish annually in the *Gazette* a list of all new and renewed grants made in the annual budget of each district and he will publish quarterly statements of grants made during the year.

4. Any school to which aid is given together with all its accounts, books and other records shall be at all times open to inspection and examination by any officer appointed by the Government for the purpose ; and to this end the records and accounts shall be placed in such custody that they will be always accessible on the visit of any inspecting officer. Such inspection and examination shall have no reference to religious instructions, but only to secular education.

5. Inspecting officers will interfere as little as possible with the local management of schools, but are employed to see that the instruction is efficient, and that the conditions on which the grants were made are fulfilled ; and aid will be withdrawn from any school in which such conditions are not fulfilled.

6. Grants are given on the principle of strict religious neutrality, and no preference will be shown to any school on the ground that any particular religious doctrines are taught or not taught therein.

7. Grants-in aid will be made to such colleges and schools only (with the exception of normal schools) as require some fee however small from their scholars. Special exemption from this rule may be allowed by the District Committee subject to the orders of the Commissioner of the division, and of Government through the Director of Public Instruction, in the case of a middle, lower, girls' or special school; provided that the education gratuitously given in such a school is confined to the children of the poor, that the endowment to which help is asked from the grant-in-aid fund is assured and permanent, and that proper machinery for managing the school is shown to exist. In the case of higher schools and colleges exception may be made by the authority of Government through the Director of Public Instruction provided that gratuitous instruction is confined to those who are unable to pay for higher education, and that those scholars only are selected who are qualified to profit by free education under rules approved by the Director.

8. The promoters or managers of any body by whom application for a grant is made must appoint a Secretary to conduct their correspondence with the District Committee and the Inspector, and they must record the names of the managers.

9. The managers are responsible for the due application of the school funds in accordance with the conditions of the grant.

10. In respect of any school for which application is made, full information must be supplied on the following points, and must be thrown into the shape given in Form A* appended to these Rules:—

- (a) The pecuniary resources permanent and temporary on which the school will depend for support.
- (b) The proposed monthly expenditure in detail.
- (c) The average number of pupils to be instructed.
- (d) The persons who will form the Committee of Management.
- (e) The nature and course of instruction.
- (f) The fees which it is proposed by the managers to levy.
- (g) The number and salaries of the teachers.
- (h) The nature and amount of aid sought.
- (i) The treasury at which the grant is sanctioned is to be payable.
- (k) The existence of other schools of a similar class within a distance of six miles.

11. Application for grants-in-aid may be made either to the Inspector of the Circle or to the Secretary of the Local Committee. In the latter case the Secretary will register the application for the information of the Members of the Committee and will see whether it is so far as he can judge, admissible under the rules. If it is he will forward it for the opinion of the Inspector. The Inspector will satisfy himself whether the application received by, or forwarded to him, is one which is admissible under the rules, and, if so, he will certify that it is so, stating the class of school and the maximum grant to which it is admissible. He will also note his opinion of the merits of the application and he will forward it to the Secretary to the Committee with his certificate endorsed. The Secretary will then register the application as one certified to be admissible and such register shall be open to the inspection of the Members of the Committee and shall be produced for their consideration on the next occasion on which grants are assigned.

12. Grants shall in no case exceed in amount the sums to be expended from private sources except in special cases under special orders of Government. Expenditure from school fees and from municipal contributions will be reckoned as expenditure from private sources.

13. Aided places of instruction are divided into the following classes:—

Colleges.—In which students who have passed the University Entrance Examination are educated in the University Course or any part of it.

Higher Schools.—In which students are educated up to the standard of the Entrance Examination.

Middle Schools.—In which the scholars are educated up to a standard lower than the University Entrance Examination, but above elementary instruction.

Lower Schools.—In which the scholars receive elementary instruction only and in the vernacular language.

Girls' Schools.—Including agencies for *zenana* instruction.

Normal Schools.—For the training of masters and mistresses.

Special Schools.—For instruction in special subjects.

14. Grants are of two kinds—annual grants and special grants.

* The forms to be had from the Department of Public Instruction.

ANNUAL GRANTS.

15. For Colleges, the grants shall not exceed one-third of the income guaranteed from private sources.

16. For higher schools, the grant shall not exceed one-half of the income guaranteed from private sources.

17. For middle schools in which the expenditure is more than Rs. 30 a month, the grants shall not exceed two-thirds of the income guaranteed from private sources except in the districts of—

The Cooch Behar Division
Dinapore
Rungpore
Mymensing
Chittagong
Tipperah
Noakhally

The Patna Division
Purneah
The Orissa Division
„ Chota Nagpore
„ Assam Division
Sylhet

in which the grants may equal the income so guaranteed,

18. For lower schools as well as for girls' schools, normal schools and other special schools the grant shall not exceed a sum equal to the full amount of the income guaranteed.

19. The amounts above set down are *maximum* amounts, and it must be understood that the *maximum* grant will not in all cases and as a matter of course be sanctioned. In the districts of—

Hooghly
Burdwan
Beerbhoom
24-Pergunnahs

Nuddea
Moorsheedabad
Dacca
Rajshahye

the *maximum* grant will not ordinarily be given.

20. Grants will be sanctioned ordinarily for terms of five years, but it will be in the power of the District Committee to make another grant to the same school for a second or third term of years. Ordinarily, renewed grant will be considerably below the maximum allowed under rules 14-18, and the grant to a school should grow smaller and smaller on such renewal. In this way money will from time to time be set free, and the Committee will be able to aid new schools even though their grant-in-aid allotment remains stationary.

When a grant is submitted for sanction a statement of the proposed establishment of the school will also be submitted for insertion in the Director's authorisation of the grant.

21. The sanction of a grant is conveyed in the following form :*

Office Memorandum of the Director of Public Instruction.

(1.) A grant of Rs. _____ a month is sanctioned from the _____ 187
for the _____ school at _____ in zillah
, on the following conditions :—

(a).—That Rs. _____ a month at least be regularly contributed from private sources.

(b).—That the following scale of expenditure be maintained :—

Rs. As. P.

Head-Master
2nd
3rd

Servants
Contingencies

Unless any alteration be sanctioned by the District Committee—

(2.) The grant is payable every month.

(3.) The monthly bills (in Form annexed) must be sent to the Inspector for countersignature and must be accompanied by a certified abstract (in form annexed) of the receipts and disbursements of the school for the month preceding that for which the bill is drawn. After countersignature the bill will be paid at the _____—treasury.

* In the case of colleges the form is modified.

- (4.) The monthly bills and the certified abstract of the school accounts must be signed by the Secretary of the School.
- (5.) The bill is countersigned on the distinct understanding that the salaries and other charges certified by the Secretary to have been paid have actually been paid.
- (6.) Contingent charges are to be accounted for in detail.
- (7.) Salaries for service in any month become due on the first day of the following month.
- (8.) The grant is liable to be reduced or withdrawn if the payment of any teacher's salary is delayed for more than two months after it has become due.
- (9.) The grant is liable to be reduced or withdrawn if the school is unfavorably reported on as regards the attendance of proficiency and the scholars.
- (10.) The grant is liable to be reduced or withdrawn if the managers employ ill-qualified masters or if they keep their accounts in a negligent and untrustworthy manner, or if they send up incorrect accounts, or if they fail to transmit punctually the periodical returns required by the Educational Department, or if the school house is unfit for the purposes of the school or is untidy or dirty.
- (11.) The grant is liable to be reduced or withdrawn if the teachers keep untidy or untrustworthy registers, or if they are frequently absent from duty.
- (12.) Holidays are not to exceed sixty days in the year exclusive of Sundays, except under peculiar circumstances and with the sanction of the District Committee.
- (13.) Every new election to the Committee of Management must be notified to the District Committee, under the signatures of the Secretary and of the member or members elected.
- (14.) Every change of Secretary must be notified to the Inspector under the signatures of the new Secretary and the members of the Committee of Management.

SPECIAL GRANTS.

21. Special grants are given towards the cost of furnishing school-houses, and providing maps and other school apparatus, in consideration of expenditure from private sources incurred in the establishment and equipment of schools, and on condition that the Managers undertake to refund the amount of any such grant, if the school obtaining it should be abolished within a period to be fixed by the Director of Public Instruction.

22. Special grants are given towards the cost of building school-house provided such houses are *pucca* masonry structures.

23. Grants are not given to pay off debts for building, nor in consideration of former expenditure for building, nor for the maintenance of buildings.

24. Before a building grant is sanctioned, the site, plans, estimates, specifications, title and trust deed must be approved by the Commissioner of the division.

25. The trust deed must declare the building to be granted in trust for school purpose and for no other purposes whatever. It must also provide for the legal ownership of the premises, for the proper maintenance of the building, and for the inspection and management of the school.

26. The grant is not paid until—

(1.) A report is received from the Executive Engineer, Department of Public Works, certifying that the building has been completed in accordance with the sanctioned plans and specifications; and

(2.) A certificate is received from the managers setting forth that the funds in their hands will, when added to the grant, be sufficient to meet all claims and finally close the account.

SPECIAL RULE FOR BACKWARD DISTRICTS.

27. In the district mentioned in rule 17 the District Committee may if they cannot usefully spend their grant-in-aid allotment in the manner provided by the foregoing rules, propose through the Commissioner schemes for encouraging aided schools.—

(1.) Either by making an allowance to each school according to the acquirements of its masters as for instance—

A yearly grant not exceeding Rs.	100	for each master who holds the degree of B A :
“ “ “ “	75	“ “ had passed the First Arts Examination :
“ “ “ “	40	“ “ Entrance “ or
		held a certificate as a passed pupil of a Government or aided normal school.

(2.) Or by making an allowance to each school according to the attainments of its pupils, as for instance—

A yearly grant of Rs. 50 for each boy who passed the Entrance Examination ;	
" " " 15 " " Minor or Vernacular scholarship test	
" " " 5 " " Pathsala Scholarship test

(3.) Or by making an allowance of one rupee per annum for each boy who attended school more than 180 days in the year ; and an extra rupee per annum for each boy who can pass in reading, writing, and the four rules of arithmetic.

CALCUTTA HIGH SCHOOL.

11, *Chowringhee Lane.*

The above School was opened on the 1st February, 1877, and is conducted by Mr. H. Roberts, *Fellow Calcutta University*, late Principal and Professor of English Literature and History, *Doveton College*, and for several years one of the Examiners of the University.

The curriculum of studies partly based on the University Entrance standard, and embracing English, Classics and Mathematics, is intended to lay the foundation of sound scholarship, and to train boys for the general business of life. There are optional classes for Music, Drawing, French, &c., taught after School hours, at a small extra charge.

The Boarding Department is under the personal superintendence of Mr. Roberts, assisted by Mrs. Roberts and a resident European Serjeant. The food, health, and comforts of the boys, as well as their moral and religious training, are carefully attended to.

The moderate scale of charges adopted, places the benefits of a sound and liberal education within the reach of a large section of the community, and the rapid growth of the School may be taken as an indication of its having supplied a long felt public want.

Infant School Mistress, Miss E Murch. Serjeant and Matron, Mr. and Mrs. Marum.

This Asylum for indigent Christian children was originally formed by the union of the *Free School Society* and the *Old Charity School*, and its present locality in Free School street was secured in 1794, by purchase of the property from Mr. Baretto. Improvements have been made from time to time; the present spacious building was erected in 1854. In 1830 Bishop Turner suggested the expediency of placing the School under clerical superintendence; and the Church on the premises called St. Thomas' Church was then erected and consecrated by Bishop Wilson in 1834.

The benefits of this Charity are not confined to the poor of Calcutta; indigent children being received from all parts of India. The Governing Body twice in the year (February and August) elect scholars on the foundation. Every subscriber to the funds has the privilege of recommending destitute children for election, and a bonus of Rs. 250 will secure a nomination to a free scholarship as vacancies arise.

Pupils are not received under 5 or over 10 years of age, nor are they permitted, unless they become pupil Teachers, to remain after attaining the age of 17.

When a child is not withdrawn by his guardian, the Governors provide him with a home, employment, and apprentice allowance.

Pupils from the advanced classes sit for the University Entrance Examination every year, but the Governors' aim is not so much to encourage exceptional ability, as to give all the children a sound elementary education adapted to their probable position and requirements on leaving. Industrial departments are attached to both the boys' and girls' schools. In 1847 the average number of Scholars was 266 and the whole list of pupils (Day Pupils and Boarders) 367.

Applications for admission should be addressed to the Honorary Secretary.

EUROPEAN FEMALE ORPHAN ASYLUM.

Established July 1815. No. 58, Lower Circular Road, Town side.

The objects of this institution are the protection and rearing up of Female Orphans of pure European parentage, giving them a plain and useful Christian education, and sending them out, at fit ages, as nursery governesses and domestic servants.

This Institution is supported mainly by subscriptions and donations.

Committee.—Miss Johnson; Mrs. Carruthers; Mrs. Palmer; Mrs. Atlay; Mrs. Coles; Mrs. Biden; and Mrs Crookshank.

Honorary Secretary.—Mrs. Pritchard. *Honorary Treasurer*.—Mrs. Mackenzie.

Lady Superintendent.—Mrs. Chew. *Work Mistress*, Mrs. Lusell. *Matron*, Mrs. Connor.

UPPER ORPHAN ASYLUM.

Established A. D. 1837. At Kidderpore.

Secretary—Charles J Gray. *Medical Officer*—Dr. W J Palmer. *Lady Superintendent*, Mrs Colquhoun Grant. *Matron*, Mrs. P. Empson.

The Upper School of the Military Orphan Society is now a Government Institution, supported chiefly by the contributions of the Officers of the Bengal Army, and restricted to the reception of their orphans.

The Society was projected in 1782 by Major-General Kirkpatrick. A proposal for its establishment was circulated to the Officers of the Army in August 1782, which was cordially agreed to with scarcely a single exception. The first meeting of the Society was held on the 29th of March 1783.

The objects of the Society, as stated in the original proposals, and as ever since acted upon, are to provide fixed funds or resources for the maintenance of the children of deceased Officers; to relieve Officers from the burden of contributing to private subscriptions in behalf of individual orphans; and in the hour of sickness and of danger to yield them the consolation that, in the event of their dying poor, a certain provision would be secured to their offspring.

LOWER ORPHAN SCHOOL.

Established A. D. 1783, No. 86, Lower Circular Road, 21-Pergunnahs' side.

Superintendent.—Charles J Gray. *Medical Officer.*—Dr. W J Palmer.

Head Mistress.—Mrs. G E MacLeod.

The Lower School of the Military Orphan Society is a public Institution, wholly supported and ruled by Government, and solely intended to receive and educate the children of European Non-Commissioned Officers and Soldiers attached to the Bengal Establishment. The Lower School was constituted by Government in May 1783, and sanctioned by the Court of Directors on the 24th of February 1786.

The objects of the School are to encourage the European Soldier to enter in the marriage state; to relieve him from the heavy burden of rearing a large offspring with very scanty means, and by the comfortable maintenance and education of his children to attach him to the service by ties which did not previously exist; to rescue the children themselves from the vices and intemperance of the barracks, and having saved them from profligacy, distress, and premature decay, to render them useful members of the community by rearing them up in the principles of the Christian religion, and by educating and respectably setting them up in life.

The concerns of the Institution are administered by a body of Managers, styled the Standing Committee, and the Controller of Military Accounts.

Course of Education.—The object of this Institution is to open to the Catholic youth a full course of liberal education, to train up their hearts to virtue, and to adorn their minds with every useful and becoming branch of knowledge. Nevertheless, pupils of other religious persuasions are also admitted.

As learning without education, properly so called, is far from sufficient to satisfy the wishes of parents for the happiness of their children, unceasing care is taken to form the character of the pupils, to inspire them with a love of religion and morality, to naturalize in them gentlemanly manners, habits of cleanliness and order; in short to fit them for the various duties of after-life. They are always attended by some of their superiors, who associate with them during the hours of recreation.

The course of studies embraces all the branches up to the M A Degree, *viz* :—

I.—The English language, as the most important and primary requisite, with frequent exercise in composition and elocution.

II.—The Latin Classics, as leading either to the University degrees or to a thorough knowledge of English.

III.—Bengali, Urdu, Persian, French and Sanskrit.

IV.—History, Sacred, and Profane; Geography, Physical and Commercial, the Use of the globes, and the Elements of Astronomy.

V.—Arithmetic, Book-keeping, Algebra, Geometry, and Trigonometry.

VI.—Higher Mathematics, Mechanics, Logic, Natural, Mental and Moral Philosophy, Astronomy, Chemistry, and Natural History.

A Lower or Infant School is open for younger pupils not sufficiently advanced to enter the First Year's Class.

A Museum or collection of specimens and instruments to illustrate Natural Philosophy, Chemistry, &c., is being gradually established. Donations for its development will be gratefully accepted and preserved with the name of the Donor.

Three times a year parents are informed of the conduct, improvement, diligence, and health of their children. They may visit them on the days and at the hours fixed by the rules. No other visitors will be introduced to them without the express permission of the parents. Boarders allowed to go out on the appointed monthly holidays, are expected back at 8 o'clock P. M., and whether on going out or returning, they must be accompanied by their parents or some person authorised by them.

ST. JOSEPH'S BOARDING AND DAY SCHOOL.

No. 69, Bow Bazar Street.

PAY DEPARTMENT.

Boarders—74. Day Scholars—170.

CONDUCTED BY THE CHRISTIAN BROTHERS.

1. The object of this Institution is to afford, on moderate terms, a sound, religious, moral, and liberal education to Catholic youth. Children, however, of other persuasions are also received.

2. The course of studies embraces all the branches up to the standard of the University Entrance Course, viz., the English language, the Latin classics, as leading either to the University degrees or to a thorough knowledge of English, History, Geography, Arithmetic, Algebra, Geometry, also the use of the Globes, Book-keeping, and Trigonometry.

3. Parents are requested to visit their children (as far as convenient) on Sundays and Thursdays only, from 11 to 2 o'clock, so as not to interfere with their studies. Other visitors, wishing to see any of the children, may do so with consent of the parents and approval of the Brother Director.

4. Parents will be informed of the conduct, progress, and health of their children, &c., twice a year. Immediate notice will be given in case of sickness.

5. Boarders whose conduct has been satisfactory during the month are permitted to go home at the monthly holiday, but must return to school at 7 P. M., accompanied, both when going and returning, by their parents, guardians, or some person authorized by them.

6. Owing to the great danger to which youth is exposed by the perusal of books, Boarders are not permitted the use of any book not approved of by the Brother Director.

7. There is a weekly holiday on Thursday and a vacation three times a year; Christmas, one month; Easter, ten days; and Midsummer, three weeks, commencing on the 22nd June.

8. All the letters written in school must be submitted to the Brother Director. The same is to be observed of those addressed to the scholars.

9. Parents not residing in Town must make such arrangements as to enable the children to be removed if such a step be found necessary.

10. Each Boarder is required to have a suit of warm clothing, 12 lighter suits, 3 pairs of shoes, 6 towels, a mattress, &c., 6 pillow-cases, 4 bed-sheets, a white mosquito curtain, a brush, comb, &c. The boy's name to be marked on each article.

The moral conduct of the Young Ladies is watched over with the strictest attention ; and while every effort is made to expand and adorn the mind, the heart is trained to virtue.

The character of the pupils is carefully studied ; they are taught, by reasoning, to correct their errors ; and are gradually formed to habits of regularity and order.

The excellent situation of Loretto House is well known. The utmost attention is paid to the proficiency, health, and comfort of the pupils.

Boys received as day pupils from three to eight years of age.

RULES.

I.—Catholic pupils only will be required to attend Divine Service.

II.—It is contrary to the Rules of the Establishment to receive Visitors on Sundays.

III.—Parents or Guardians may visit the Children on Wednesday from 11 A M to 2 P. M.; but they are not expected to visit them oftener than once in the month.

IV.—Three vacations are given during the year—a week at Easter, a fortnight during the Summer, and about a month at Christmas. Besides the vacation times, boarders, whose conduct has been satisfactory, will be permitted to go home on the last Thursday of every month, their own birthday and that of their parents, and in any case of necessity.

V.—No reduction is made on account of absence from school during the fixed vacations.

VI.—Each month's education being paid for quarterly in advance, no allowance is made for absence when a month is once entered upon.

VII.—Previously to the removal of a Child from School, a month's notice or the payment of a month's pension is required.

VIII.—Each Young Lady on entering Loretto House is to come supplied with the clothing and uniform prescribed by the Rules of the Institution.

N. B.—It is particularly requested that Parents or Guardians will deposit with the Lady Superior the pocket-money which they may allow for the use of their children or wards. This precaution is necessary in order to prevent the injudicious or injurious outlay of such money by the pupils.

Parents or Guardians are requested to appoint an Agent in Calcutta to procure for their children or wards whatever clothes, &c., &c., they may require after admittance into the Establishment.

NOTICE.

Much inconvenience to the community having been frequently occasioned by Visitors calling at unseasonable times, it has been arranged that, except in case of necessity, Visitors will be received only at the hours fixed upon by general usage in Calcutta, *viz.* from 11 A. M. to 2 P. M.

The community will feel greatly obliged if Parents, Guardians, or others, who may have business to transact at the Convent, will kindly attend to this Regulation when they can do so without inconvenience.

BENGAL MASONIC ASSOCIATION :—*General.*
 The President, Vice-Presidents and Life Governors.

BENGAL MASONIC ASSOCIATION.
 FOR EDUCATING CHILDREN OF INDIGENT FREEMASONS
Registered under Act XXI of 1860.
 INSTITUTED IN 1869.

President :—Hugh David Sandeman, D.G.M. (*Absent.*) J. Pitt-Kennedy, acting D.G.M.
 This Association is supported by voluntary contributions.

1. A donation of Rs. 500, made in one or more payments of not less than Rs. 50 each, constitutes the donor a Vice-President, with the privilege of five votes.

2. A donation of Rs. 100 constitutes the donor a Governor for Life, with the privilege of one vote, and one vote for each additional donation of Rs. 100.

3. A subscription of Rs. 16 per annum entitles the subscriber to one vote, and an extra vote for every additional Rs. 16.

4. The conditions of the above are the same, whether the donor or subscriber be an individual, or a Lodge, Chapter, or other Society.

5. A general meeting of subscribers is held twice in the year, *viz.*, on the 1st Wednesday in the months of June and December, at 4 o'clock in the afternoon.

6. The general conduct of the affairs of the Association is entrusted to a Committee composed of the President, Vice-Presidents, and Life Governors, which meets on the 1st Wednesday in every month, at 4 o'clock in the afternoon.

7. The funds of the Association are devoted solely to the board and education of children.

8. Children are admitted into the Association at the age of 6 years, and continue therein till they have attained the age of 16 years.

This rule applies equally to children of both sexes, without any distinction of religious denomination.

9. Elections take place at each general meeting of subscribers, according to the number of vacancies and capabilities of the fund.

10. No child is eligible to be placed on the list of candidates unless his (or her) father has been a registered Mason for five years, and a subscribing member of some Lodge for at least three years of that period.

Subscriptions are received by the District Grand Secretary and by the Secretary to the Association (Freemasons' Hall.)

D J ZEMIN,
Honorary Secretary.

Memo.—A complete record of the proceedings of the Association is filed in the office of the Registrar-General.

FROM NAPLES OR MARSEILLES TO LONDON.

First Class Through Tickets are issued in Naples or Marseilles for the journey to London. These Tickets are available for 14 days, and the holder is entitled to break the journey during that period by stopping at Lyons, Dijons, Paris, Amiens, Calais, and Dover (or Boulogne and Folkestone,) Price—*Via* Dover and Calais, £ 7-5; *via* Folkestone and Boulogne, £7-1-3; and also from Naples to London *via* Florence, Paris, Calais or Boulogne, at £12-2-6.

GENERAL INFORMATION.

The Company's Steamers proceed direct to Marseilles (changing only at Galle) *via* the Suez Canal, and Passengers have no more to incur the inconvenience and *expenses* of the transit by rail through Egypt.

Table Wines or Beer are supplied free, and choice wines, Champagne, &c., can be purchased on board the Steamers.

The days and hours of departures from Marseilles, Yokohama, Shanghai, Hong Kong, Batavia and Calcutta, are the only fixed dates, subject, however, to the alterations occasioned by changes in the monsoon. The days of departures from and arrivals at the other ports are subordinate to the length of the passage.

First Class Passengers.

Every First Class Passenger is entitled to one berth in a *two-berth cabin*.

The exclusive use of one cabin can be secured for one Passenger by paying 50 per cent, additional fare.

Second Cabin Passengers.

Special second Cabin accommodation has been provided for Ladies and Gentlemen, who are entitled each to one berth in a four-berth Cabin and have the use of a Reserved Saloon with Private Table.

Steerage Passengers.

Steerage Passengers occupy berths in a General Cabin, formerly allotted to Second Class Passengers, with separate table.

Children.

Children (with the Parent) between three and ten years of age, are charged half-rate of the class of the Parent; those under three years (no berth provided) free.

One berth will be allowed for one child paying half-fare; but two children paying half-fare each are entitled to one berth only.

European Servants.

Passengers' European Servants will be admitted as Third Class Passengers, paying that rate. They may, however, obtain berths in a special Second Class Cabin, with a reduction of 20 per cent. on the Second Class rate; but they cannot in any case be admitted at the table of Second Class Passengers.

Reduction on Return Passage.

A reduction of 20 per cent. on the Return Passage is made to Passengers from Ports East of Aden to Europe, or *vice versa*, re-embarking within *six* months from the date of their arrival; and a reduction of 10 per cent. to those re-embarking within *twelve* months.

From Port to Port, or between Ports East of Suez, a reduction of 20 per cent. on the return Passage, is made to Passengers re-embarking within *three* months from the date of their arrival, and a reduction of 10 per cent. to those re-embarking within *twelve* months.

Native Servants and their Return.

Native Servants are admitted as Deck Passengers, or as Third Class Passengers. When brought to Europe by a First Class Passenger and sent back *immediately* to a port Eastward of Aden, they are entitled to a Free Return Passage in the former case and to a reduction of 50 per cent. in the latter case. If sent back within three months after arrival, they will be allowed half-fare reduction if Deck Passengers, and only 30 per cent. reduction if Third Class Passengers.

MEDICAL ATTENDANCE.

Each of the Company's Steamers carries a qualified Surgeon.

Baggage.

Passengers are entitled to the *Free conveyance* of Baggage to MARSEILLES or LONDON as follow:—

First class and second cabin passengers, 150 Kilos (3 cwt.) Children from 3 to 10 ears, and Steerage passengers, 75 Kilos (1½ cwt.)

On landing at Marselles from the Company's Steamers, passengers intending to proceed to London may consign their luggage to the Messageries Maritimes Agents (*only*) for transmission to London by the next Company's Steamers, via Gibraltar, or at their expense, by *grande vitesse* via Boulogne. All luggage to be claimed at the London Head Office of the Company, 97, Cannon street, E. O.

Insurance on luggage can be effected through the Company's Agencies at moderate rates.

N. B.—All baggage should be strongly packed, and marked with the Owner's name and port of destination in paint, in full. The Company will not be responsible for the safe conveyance of insecure Packages.

Return tickets for Madras, Pondicherry, and Galle.

Special Return tickets for Madras, Pondicherry, and Galle, including the outward and inward passages when paid in advance, available for four months, are issued at a reduction of 25 per cent. on the tariff rates.

BOMBAY, VIA MARSEILLES.

In consequence of recent arrangements with the Peninsular and Oriental Company, through tickets from MARSEILLES to BOMBAY by the M. M. Steamers from MARSEILLES to ALEXANDRIA, and thence by the P. & O. Co.'s Service to BOMBAY, are issued at the P. & O. Co.'s Offices, 122, Leadenhall street, E.C., also at the M. M.'s Offices, 97, Cannon street at the following fares :

First Class **£62**

(Second Class P. & O. and Third Class M. M)

Second Class **£31**

Exclusive of transit through Egypt.

These Tickets are available by the Steamers of the MESSAGERIES MARITIMES from MARSEILLES to ALEXANDRIA, via Naples leaving the former Port every Thursday at noon, and by the PENINSULAR and ORIENTAL STEAM NAVIGATION COMPANY Steamers from SUEZ to BOMBAY.

Passengers are requested to take notice that neither Company is responsible for any failure of the Steamers of the one to connect with those of the other; and that neither is responsible for the consequences of any act or default of the other.

Similar Tickets from BOMBAY to MARSEILLES can be obtained from the PENINSULAR and ORIENTAL STEAM NAVIGATION COMPANY'S AGENT, in the former City.

Departure from Alexandria to Marseilles every Tuesday.

Half the amount of Passage-money, when the passage exceeds Rs. 200, is required to be paid on securing passage, and the balance a fortnight before embarkation.

Passengers not embarking after paying passage, forfeit half the amount of passage money.

In case, however, of a passenger being unavoidably prevented from availing himself of a passage at the period for which it was taken, a transfer of the passage can be effected to a subsequent Steamer, on sufficient notice being given, without forfeiture of any portion of the deposit paid, and accommodation will be allotted as similar as circumstances will permit.

The Passage Tickets are delivered on the conditions stipulated thereon. Passengers are to accept all consequences resulting from the employment of the Steamers in the Mail Service. The Baggage tickets are issued under the same conditions.

The Passage Tickets delivered by the Agents of the Company *must, in order to be made available, be signed by the Passenger to whom they are delivered.*

Time Tables, Rates of Freight on Goods and Parcels, and any further particulars on the INDIA, CHINA, and JAPAN; REUNION and MAURITIUS; as well as for the MEDITERRANEAN and the ATLANTIC LINES, can be obtained by application to the Company's Office, where the plans of the Steamers may be also seen.

INFORMATION.

The Company cannot guarantee the steamers sailing from the intermediate ports on the dates given in the time tables, but every effort is made to ensure their doing so.

Passengers proceeding to Bombay from Calcutta may land at Madras and proceed by rail to Beypore and meet the steamer there or at Calcut.

Passengers from Bombay to Madras and Calcutta may land at Beypore, and take the Railway to Madras; the first-class Railway fare betwixt Madras and Beypore is Rs. 24.

NOTE.—The following are the fixed ports of call at which all the weekly steamers on this line touch (weather permitting) *viz.*, Gopulpore, Bimlipatam, Vizagapatam, Coconada, Madras, Neapatam, Colombo, Tuticorin, Cochin, Calicut, Cannanore, Mangalore, and Carwar. The ports at which the steamers only occasionally call, also those at which the steamers call every fortnight only, will be found in the time tables.

During the South-West Monsoon, *viz.*, from the beginning of June to end of August, the steamers do not communicate with the ports of Mangalore, Cannanore, Calicut and Cochin; but passengers for these ports and the Neelgherries may be landed at Narrakal, six miles north of Cochin, from whence they may proceed by back water to stations on the Madras Railway.

The Rifle Corps is composed of effective and Honorary Members.

Effective Members are required to attend 9 drills each year, 6 of which must be drills of the whole Battalion. They must also possess a competent knowledge of Squad and Company drill, including the Manual and Firing exercises, skirmishing in Company and Musketry drill. Recruits must attend 30 drills, (Squad, Company, Battalion and Musketry) to become effective.

Every Volunteer must be present at the Annual Inspection of the Corps, unless absent with the sanction of the Commanding Officer, and fire 60 rounds in class firing.

Honorary Members are not required to undergo any Drill.

Honorary Members must contribute Rs. 24 annually and are allowed the privilege of using the Rifle Range for practice, of wearing the uniform of a Private of the Corps, and of purchasing ammunition at cost price.

A Capitation grant of Rs. 20 is allowed annually by Government for every Member who has made himself effective by attending the prescribed number of drills, and an extra efficiency allowance of Rs. 10 for every Volunteer who during that season passes out of the 3rd class at Target practice. This allowance is devoted to providing uniform which is issued free, and to certain other specific purposes laid down by Government.

The Regimental Rifle Ranges are situated, one at Bailgurriah on the Eastern Bengal Railway, 7 miles from Calcutta, and the other a new one, just completed, at Ballygunge. They both extend to 1,000 yards.

The Ballygunge Range is furnished with an improved system of sliding targets, which admits of the shot marks being obliterated after each shot, and also of an indicator being fixed to shew the exact position of each hit, without exposure of the men marking. This range is also an excellent one in other respects, and being conveniently near to Calcutta, affords opportunities for rifle practice, such as no other place in India and few at home can boast.

The Regiment is now connected with the National Rifle Association. The silver medal of the Association is competed for annually by first-class shots in class firing of the season.

The Regiment receives the "Volunteer Service Gazette," the official organ of the Volunteer Force throughout the world. The Gazette is regularly filed in the Orderly Room at Head Quarters for the perusal of Members of the Corps.

The general business of the Corps is managed by a General Committee composed of Members from each Company, elected annually at the commencement of each season.

The days for drills and parades are fixed at the commencement of each season and intimation of the arrangements for each week is published in the Daily Papers on the Saturday morning previous.

Gentlemen wishing to join the Corps should apply to Head-Quarters where every information can be obtained.

The C. V. R. Club at 6, Lindsay street, is open to all effective members at a monthly subscription of Rs. 3 for Officers; Re. 1 for Serjeants, and 8 annas for other Members. In the Reading Room will be found the daily Indian and weekly English Papers. A Billiard Room and Canteen are attached to the Club.
